Communications; Public Notice

January 23, 2004.

This constitutes notice, in accordance with 18 CFR 385.2201(b), of the receipt of exempt and prohibited off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive an exempt or prohibited off-the-record communication relevant to the merits of a contested on-the-record proceeding, to deliver a copy of the communication, if written, or a summary of the substance of any oral communication, to the Secretary.

Prohibited communications will be included in a public, non-decisional file associated with, but not a part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become a part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication, and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such a request only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication shall serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications will be included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

The following is a list of prohibited and exempt communications recently received in the Office of the Secretary. The communications listed are grouped by docket numbers. Title: NESHAP for Mineral Wool Production (40 CFR Part 63, Subpart DDD).

Abstract: The Administrator has judged that particulate matter (PM) and

hazardous air pollutant (HAP) emissions from mineral wool production plants cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Owners/operators of mineral wool production plants subject to NESHAP for Mineral Wool Production (40 CFR part 63, subpart DDD) must provide notifications to EPA of construction, modification, startups, shut downs, date and results of initial performance tests and provide semiannual reports of excess emissions. Owners/operators of mineral wool production plants are required to install fabric filter bag leak detection systems and then initiate corrective action procedures in the event of an operating problem. Owners/operators of mineral wool production plants subject to NESHAP subpart DDD must also continuously monitor and record: (1) The operating temperature of each thermal incinerator; (2) cupola production (melt) rate; and (3) for each curing oven, the formaldehyde content of each binder formulation used to manufacture bonded products.

In order to ensure compliance with the standards promulgated to protect public health, adequate reporting and recordkeeping are necessary. In the absence of such information, enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 126 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of

information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Mineral Wool Production Facilities.

Estimated Number of Respondents: 12.

Frequency of Response: Initial and semiannual.

Estimated Total Annual Hour Burden: 3,018 hours.

Estimated Total Annual Costs: \$199,906 which includes \$0 annualized capital/startup costs, \$9,000 annual O&M costs, and \$190,906 labor costs.

Changes in the Estimates: There is decrease of 2,761 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is due to the fact that the compliance date of June 2, 2002, has passed and all existing facilities have already submitted all required notifications and completed all required performance testing. Therefore, the remaining burden on the industry is primarily the operation and maintenance of the control equipment (e.g., baghouse leak detection systems) and the semiannual reporting.

Dated: January 22, 2004.

Doreen Sterling,

Acting Director, Collection Strategies Division.
