

Authorizations (EUAs) Related to Coronavirus Disease 2019 (COVID-19),” announced in the **Federal Register** of March 27, 2023 (88 FR 18144). The guidance document describes a phased-in approach intended to help avoid disruption in device supply and help facilitate compliance with applicable legal requirements. The recommendations discussed in the guidance document result in the one-time collection of information intended to ensure an orderly and transparent transition from temporary policies established during the COVID-19 public health emergency to normal operations.

In the **Federal Register** of December 23, 2021 (86 FR 72978), FDA published a 60-day notice requesting public comment on the proposed collection of information. However, upon further review, we find the recommendations discussed in the guidance document apply to specific medical devices already issued EUAs and characterize the activity as non-standardized followup designed to clarify responses to approved collections of information, *i.e.*, plans for continued compliance unique to that medical device issued an EUA. We therefore believe the activity constitutes the collection of non-identical and/or followup information, as defined under 5 CFR 1320.3. At the same time, we expect some degree of fluctuation in submissions under 21 CFR 814.20, as a result of implementation of the medical device transition plan. Information collection associated with 21 CFR part 814 is currently approved in OMB control number 0910-0231.
