

2. Participation Guidelines for Oral Limited Appearance Statements

Any person not party to the proceeding has the opportunity, as specified below, to make an oral statement setting forth his or her position on matters of concern relating to this proceeding. Although these statements will be transcribed, and will become part of the record of the proceeding for future reference, they do not constitute evidence upon which a decision may be based.

Oral limited appearance statements will be entertained during the hours specified above, or such lesser time as may be sufficient to accommodate the speakers who are present (if all scheduled and unscheduled speakers present at a session have made a presentation, the Licensing Board reserves the right to terminate the session before the ending times listed above). The Licensing Board also reserves the right to cancel any session scheduled above if there has not been a sufficient showing of public interest as reflected by the number of preregistered speakers.

In order to accommodate as many speakers as feasible, the time allotted for each statement normally will be no more than three minutes. That time limit may be altered, depending on the number of written requests that are submitted in accordance with subsection 3 below, and/or the number of persons present at the designated times. The same security guidelines applicable to the hearing will be applicable to the limited appearance sessions as well, although the limited appearance sessions are not deemed to be "adjudicatory proceedings" within the meaning of those guidelines.

3. Submitting a Request To Make an Oral Limited Appearance Statement

Persons wishing to make an oral statement who have submitted a timely written request to do so will be given priority over those who have not filed such a request. In order to be considered timely, a written request to make an oral statement must be mailed, faxed, or sent by e-mail so as to be received at NRC Headquarters by 4:30 p.m. EST on *Monday, April 1, 2002*. In light of possible mail delivery delays, persons able to do so may wish to use fax or e-mail to assure that their requests are timely received.

The request must specify the day and time of the session at which the oral statement is to be made (specify *Monday, April 8* or *Friday, April 26, 2002*, and specify *afternoon* or *evening*). Based on its review of the requests

received at NRC headquarters by April 1, 2002, the Licensing Board may, as noted above, decide to cancel one or more sessions due to lack of interest. Any such cancellation will be communicated to local news media and, if possible, posted on the NRC website.

Written requests to make an oral statement are to be submitted to:

Mail: Office of the Secretary, Rulemakings and Adjudications Staff, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

Fax: (301) 415-1101 (verification (301) 415-1966).

E-mail: hearingdocket@nrc.gov.

In addition, using the same method of service, *a copy of the request must be sent to the Licensing Board as follows:*

Mail: PFS Limited Appearance Box, Atomic Safety and Licensing Board Panel, Mail Stop T-3F23, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

Fax: (301) 415-5599 (verification (301) 415-7550).

E-mail: mrm@nrc.gov.

Phone requests to make limited appearance statements will not be accepted.

4. Submitting Written Limited Appearance Statements

A written limited appearance statement may be submitted at any time. Such statements should be sent to the Office of the Secretary using the methods prescribed above, with a copy to the Licensing Board as noted above.

* * * * *

Documents relating to the PFS license application at issue in this proceeding are now on file at the Commission's Public Document Room, 11545 Rockville Pike, Rockville, Maryland, 20850, and at the University of Utah, Marriott Library, Documents Division, 295 S. 1500 East, Salt Lake City, Utah 84112-0860, and may also be obtained through ADAMS, the electronic Agencywide Documents Access and Management System, accessible through the NRC website.

Dated: Rockville, Maryland, March 1, 2002.

For the Atomic Safety and Licensing Board.

Michael C. Farrar,

Administrative Judge.

Excerpt from **Federal Register** notice published on June 12, 2001 (66 FR 31719):

In order to balance the orderly conduct of government business with the right of free speech, the following procedures regarding attendance at NRC public meetings and hearings have been established:

Visitors (other than properly identified Congressional, press, and government

personnel) may be subject to personnel screening, such as passing through metal detectors and inspecting visitors' briefcases, packages, etc.

Signs, banners, posters and displays will be prohibited from all NRC adjudicatory proceedings (Commission and Atomic Safety and Licensing Board Panel hearings) because they are disruptive to the conduct of the adjudicatory process. Signs, banners, posters and displays not larger than 18" x 18" will be permitted at all other NRC proceedings, but cannot be waved, held over one's head or generally moved about while in the meeting room. Signs, banners, posters and displays larger than 18' x 18' will not be permitted in the meeting room because they are disruptive both to the participants and the audience. Additionally, signs, banners, posters, and displays affixed to any sticks, poles or other similar devices will not be permitted in the meeting room.

The presiding official will note, on the record, any disruptive behavior and warn the person to cease the behavior. If the person does not cease the behavior, the presiding official may call a brief recess to restore order and/or ask one of the security personnel on hand to remove the person.

Copies of this notice were sent this date by Internet e-mail transmission to counsel for (1) Applicant PFS; (2) intervenors Skull Valley Band, Ohngo Gaudadeh Devia, Confederated Tribes of the Goshute Reservation, Southern Utah Wilderness Alliance, and the State of Utah; and (3) the NRC Staff.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-311]

PSEG Nuclear LLC; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-75 issued to PSEG Nuclear LLC (the licensee) for operation of the Salem Nuclear Generating Station, Unit No. 2, located in Salem County, New Jersey.

The proposed amendment would revise Technical Specification (TS) Section 6.8.4.f, "Primary Containment Leakage Rate Testing Program." The proposed change would allow a one-time test interval extension for the Salem Nuclear Generating Station, Unit No. 2, Type A Integrated Leakage Rate Test (ILRT) from a maximum 10-year interval to a maximum 15-year interval.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in Title 10 of the Code of Federal Regulations (10 CFR), § 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The NRC staff has reviewed the licensee's analysis against the standards of 10 CFR 50.92(c). The NRC staff's review is presented below:

The proposed change to TS Section 6.8.4.f would not involve a significant increase in the probability or consequences of an accident previously evaluated. The current containment ILRT test interval of 10 years would be extended, on a one-time basis, to 15 years from the most recent ILRT. Because the ILRT test extension does not involve a modification to plant systems or result in a change to plant operations that could initiate an accident, there would be no increase in the probability of an accident previously evaluated. Furthermore, the proposed extension to Type A testing does not involve a significant increase in the consequences of an accident. NRC staff research documented in NUREG-1493, "Performance-Based Containment Leak-Test Program," found that very few potential containment leakage paths fail to be identified by Type B and C tests. The study concluded that changing ILRT testing frequency to once every 20 years would lead to an imperceptible increase in the consequences of an accident. As a result, the proposed one-time extension to the ILRT test interval does not involve a significant increase in the probability of occurrence or consequences of an accident previously analyzed.

The proposed revision to Section 6.8.4.f does not create the possibility of a new or different kind of accident from any accident previously analyzed. Because there are no physical changes, or changes in operation of the plant

involved, the proposed TS amendment could not introduce a new failure mode or create a new or different kind of accident. Therefore, the proposed amendment does not create the possibility of a new or different kind of accident from that previously analyzed.

The proposed TS change does not involve a significant reduction in the margin of safety. The NRC staff's study on the effects of extending containment leakage testing found that a reduction in the ILRT frequency would lead to an imperceptible decrease in the margin of safety. The estimated increase in risk is very small because ILRTs identify only a few potential leakage paths that cannot be identified through local leakage rate testing (Type B and C tests). At Salem, Type B and C testing will continue to be performed at a frequency currently required by the TS. Therefore, the proposed changes do not involve a significant reduction in margin of safety.

Based on the NRC staff's analysis, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and should cite the publication date and page number of this **Federal Register** notice. Written comments may

also be delivered to Room 6D59, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland, from 7:30 a.m. to 4:15 p.m. Federal workdays. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland.

The filing of requests for hearing and petitions for leave to intervene is discussed below.

By April 8, 2002, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714, which is available at the Commission's Public Document Room, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland, or electronically on the Internet at the NRC Web site <http://www.nrc.gov/reading-rm/doc-collections/cfr/>. If there are problems in accessing the document, contact the Public Document Room Reference staff at 1-800-397-4209, 301-415-4737, or by e-mail to pdr@nrc.gov. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the

subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attention: Rulemakings and Adjudications Staff, or may be delivered to the Commission's Public Document Room, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland, by the above date. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and to Jeffrie J. Keenan, Esquire, Nuclear Business Unit—N21, PO Box 236, Hancocks Bridge, NJ 08038, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated [date], which is available for public inspection at the Commission's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC Public Document Room Reference staff by telephone at 1-800-397-4209, 301-415-4737 or by e-mail to pdr@nrc.gov.

Dated at Rockville, Maryland, this 1st day of March, 2002.

For the Nuclear Regulatory Commission.

Robert Fretz,

Project Manager, Section 2, Project Directorate I, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

Florida Power and Light Co.; Saint Lucie Plant, Units 1 and 2

Notice of Intent to Prepare An Environmental Impact Statement And Conduct Scoping Process; Correction

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of intent; correction.

SUMMARY: This document corrects a notice appearing in the **Federal Register** on February 28, 2002 (67 FR 9333), that informs the public that the NRC will be preparing an environmental impact statement in support of the review of the license renewal application and to provide the public an opportunity to participate in the environmental scoping process. This action is necessary to correct an incomplete electronic address.

FOR FURTHER INFORMATION CONTACT: Dr. Michael T. Masnik, Office of Nuclear Reactor Regulation, telephone (800) 368-5642, extension 1191.

SUPPLEMENTARY INFORMATION: On page 9334, in the third column, second paragraph, in the third sentence, the e-mail address is corrected to read: "*St Lucie EIS@nrc.gov*."

Dated at Rockville, Maryland, this 1st day of March, 2002.

For the Nuclear Regulatory Commission.

Michael T. Lesar,

Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

Request to Amend a License to Export Highly-Enriched Uranium

Pursuant to 10 CFR 110.70(b)(2) "Public notice of receipt of an application," please take notice that the Nuclear Regulatory Commission has received the following request to amend an export license. Copies of the request are available electronically through ADAMS and can be accessed through the Public Electronic Reading Room (PERR) link <http://www.nrc.gov/NRC/ADAMS/index.html> at the NRC Homepage.

A request for a hearing or petition for leave to intervene may be filed within 30 days after publication of this notice in the **Federal Register**. Any request for hearing or petition for leave to intervene shall be served by the requestor or
