Information Technology for Reliability and Markets; Notice of Technical Conference

July 6, 2004.

Take notice that the Federal Energy Regulatory Commission will host a technical conference on Wednesday, July 14, 2004 to discuss information technology for reliability and markets. The workshop will be held at the Commission's Washington, DC headquarters, 888 First St., NE., 20426. The workshop is scheduled to begin at 9 a.m. and end at approximately 4 p.m. (EST) in the Commission Meeting Room, Room 2-C.

The goal of the technical conference is to discuss Reliability Coordinators' and Control Areas' use of information technology for electric bulk system reliability and markets. The Commission seeks to reduce IT costs, enhance software quality and security, and promote competition in reliability and market software development, with the desired result of enhancing grid reliability, increasing software compatibility to reduce reliability and market seams, and ultimately lowering costs to customers. Topics to be discussed will include best practices for IT management, system architecture, specific IT projects underway within the Independent System Operation/Regional Transmission Operator Council's Information Technology Committee, and progress since FERC's last software conference. A draft agenda is provided as Attachment A.

The conference is open for the public to attend, and preregistration is not required. There will be no on-line registration established for this event; on-site attendees may simply attend on the day of the event.

Transcripts of the conference will be immediately available from Ace Reporting Company (202-347-3700 or 1-800-336-6646) for a fee. They will be available for the public on the Commission's eLibrary system seven calendar days after FERC receives the transcript. Additionally, Capitol Connection offers the opportunity for remote listening and viewing of the conference. It is available for a fee, live over the Internet, by phone or via satellite. Persons interested in receiving the broadcast, or who need information on making arrangements should contact David Reininger or Julia Morelli at the Capitol Connection (703-993-3100) as

soon as possible or visit the Capitol Connection Web site at <http://www.capitolconnection.gmu.edu> and click on "FERC."

FEDERAL COMMUNICATIONS COMMISSION

[DA 04-2071]

Wireless Telecommunications Bureau Extends the Freeze on High Power Use of the 460-470 MHz Band Offset Channels

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: This document informs that the freeze on the filing of applications for high power operations on 12.5 kHz offset channels in the private land mobile radio (PLMR) 460-470 MHz band will remain in effect until December 31, 2005. The Bureau is extending the duration of the freeze to provide hospitals and other health care providers that operate medical telemetry equipment in the 460-470 MHz band adequate time to migrate to spectrum dedicated to the Wireless Medical Telemetry Service ("WMTS"), while providing PLMR users a date certain by which the freeze will end. The Bureau does not anticipate any further extensions of the December 31, 2005 deadline.

DATES: Effective July 8, 2004.

FOR FURTHER INFORMATION CONTACT: Freda Lippert Thyden, freda.thyden@fcc.gov, Public Safety & Critical Infrastructure Division, Wireless Telecommunications Bureau, (202) 418-0627, or TTY (202) 418-7233.

SUPPLEMENTARY INFORMATION: This is a summary of a Public Notice released on July 8, 2004.

1. The Commission, in 1995, adopted a new, more efficient channel plan for PLMR services in the 450-470 MHz band. Under the channel plan adopted, channels in the 450-470 MHz band that were 12.5 kHz removed from regularly-assignable channels at that time ("12.5 kHz offset channels") would be available for high power operations. Previously, medical telemetry systems used these "offsets" on a secondary, noninterference basis to primary adjacent channel PLMR operations. Recognizing that co-channel, high power operations could result in interference to medical telemetry operations, the Bureau froze the filing of applications for high power operations on offset channels in the 450-470 MHz band pending resolution of the medical telemetry issues.

2. In June 2000, the Commission established the Wireless Medical Telemetry Service (WMTS), an action aimed at ensuring that in-hospital medical telemetry devices can operate
