

candidate conservation agreements with assurances, and habitat conservation plans in the regulations to reduce uncertainty. We also propose to make technical and administrative revisions to the regulations.

The goal of the rule is to reduce the time it takes for applicants to prepare and develop the required supporting documents, thus accelerating conservation implementation. The proposed regulatory changes are intended to reduce costs and time associated with negotiating and developing the required documents to support the applications. We anticipate that these improvements will encourage more individuals and companies to

engage in these voluntary programs, thereby generating greater conservation results overall.

When the Service finalizes this rule, anticipated in late 2023, candidate conservation agreements with assurances (CCAAs) and safe harbor agreements will no longer be in place, and will be combined into one agreement type—conservation benefit agreements (CBAs). We will update the Policy Regarding Voluntary Prelisting Conservation Actions to replace all references to CCAAs with references to CBAs (for non-listed species). We do not anticipate this update to the policy to impact currently approved information collections.
