

habitat, emphasizing the Reserve's need to represent bioregional habitat types as required by NOAA; and Goal (3) address specific projects, emphasizing acquisitions that allow Reserve staff to respond to opportunities that will advance South Slough NERR research, education and stewardship objectives.

The Areas of Interest in which future acquisition efforts will be focused are described as follows:

Area of Interest 1—the Winchester Creek watershed. The Winchester Creek watershed was identified as the most critical property to protecting the South Slough mission and addressing the CPAC's goals and selection criteria because of its large size and landscape relationship to the South Slough NERR. Only 10% of the acquisition resources were recommended for targeting this Area of Interest due to the existing solid partnership between Coos County (major property owner) and the South Slough NERR.

Area of Interest 2—watersheds of the east-west streams which are tributary watersheds feeding into the existing South Slough NERR boundaries. The decision was reached that controlling the headwaters of creeks draining into Reserve bottomlands is a relatively high priority for protecting Reserve habitats and for enhancing opportunities for research initiatives. Therefore, the CPAC recommended that up to 30% of the acquisition resources be available to achieve the acquisition goals for this Area of Interest.

Area of Interest 3—the north watersheds of South Slough, including several tributaries, ocean inputs, and shorelines outside the South Slough watershed. Activities in the watershed tributary to South Slough outside the NERR boundaries, and in the waters of the Coos Bay and ocean immediately outside South Slough can have impacts on conditions inside the South Slough NERR boundary. Because of small parcel sizes and numerous owners, 25% of the acquisition resources were allocated by the CPAC to this Area of Interest.

Area of Interest 4—the town of Charleston, Oregon; This Area of Interest is identified in order to seek and respond to opportunities for a South Slough NERR presence in the town, such as an interpretive facility. Up to 15% of the acquisition resources were recommended by the CPAC for this Area of Interest.

Area of Interest 5—the existing South Slough NERR ownership. These lands are identified as an Area of Interest based on the finding that water and mineral rights associated with some of these parcels are owned by parties other

than the State of Oregon, and these should be dealt with either through acquisition or agreement. A resource allocation level of 5% was identified for this Area of Interest.

Area of Interest 6—Coos Bay Estuary. Within this Area of Interest, the SSNERR will dedicate resources to negotiating partnerships on lands outside the immediate South Slough area, but within the Coos Estuary. This does not preclude fee simple purchases. A resource allocation of 10% is dedicated to this Area of Interest.

Area of Interest 7—biogeographic regional opportunities. Resources will be dedicated to negotiating partnerships on public lands outside the South Slough watershed, but within the greater biogeographic region for purposes of adding under-represented habitat types to the South Slough NERR program. Only 5% of the acquisition resources as recommended by the CPAC for this Area of Interest.

The Cooperative Plan presents information gathered on the Planning Area, including general property valuation and ownership. Mineral and water rights of the existing Reserve lands are also summarized. A landscape assessment is provided for the Planning Area, with information on the occurrence of habitat types that are not presently represented in the Reserve.

The Cooperative Plan recognizes the need to leverage the Gustafson bequest using grant or other funds.
