

DEPARTMENT OF DEFENSE**Department of the Army****Availability of Non-Exclusive, Exclusive License or Partially Exclusive Licensing of U.S. Patent Concerning Polymerization of Aromatic Monomers Using Derivatives of Hematin****AGENCY:** Department of the Army, DoD.**ACTION:** Notice.

SUMMARY: In accordance with 37 CFR Part 404.6, announcement is made of the availability for licensing of U.S. Patent No. U.S. 7,479,329 entitled "Polymerization of Aromatic Monomers Using Derivatives of Hematin" issued January 20, 2009. This patent has been assigned to the United States Government as represented by the Secretary of the Army.

FOR FURTHER INFORMATION CONTACT: Mr. Jeffrey DiTullio at U.S. Army Soldier Systems Center, Kansas Street, Natick, MA 01760, Phone: (508) 233-4184 or E-mail: Jeffrey.Ditullio@natick.army.mil.

SUPPLEMENTARY INFORMATION: Any licenses granted shall comply with 35 U.S.C. 209 and 37 CFR Part 404.

Brenda S. Bowen,

Army Federal Register Liaison Officer.

BILLING CODE 3710-08-P

DEPARTMENT OF DEFENSE**Department of the Army; Corps of Engineers****The Release of the Draft Environmental Impact Statement (DEIS) and the Announcement of a Public Hearing for the Proposed Construction of the Western Wake Regional Wastewater Management Facilities, Which Includes Regional Wastewater Pumping, Conveyance, Treatment, and Discharge Facilities To Serve the Towns of Apex, Cary, Holly Springs and Morrisville, as Well as the Wake County Portion of Research Triangle Park (Service Area), NC**

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice.

SUMMARY: The U.S. Army Corps of Engineers (COE), Wilmington District, Regulatory Division has been reviewing the request for Department of the Army authorization, pursuant to Section 404 of the Clean Water Act from the Town of Cary, acting as the lead for the Western Wake Regional Wastewater

Management Facilities Project Partners (Western Wake Partners), to construct Regional Wastewater Management Facility. The proposed project consists of regional wastewater pumping, conveyance, treatment, and discharge facilities to serve the Towns of Apex, Cary, Holly Springs and Morrisville, as well as the Wake County portion of Research Triangle Park (RTP South), NC.

The project is being proposed by the Western Wake Partners to provide wastewater service for planned growth and development in the project service area and to comply with two regulatory mandates. One regulatory mandate has been issued by the North Carolina Environmental Management Commission (EMC), and the second regulatory mandate has been issued by the North Carolina Department of Environment and Natural Resources (NC DENR).

DATES: The Public Hearing will be held at the Town of Apex Town Hall, 73 Hunter Street, Apex North Carolina, on April 14, 2009 at 6 p.m. Written comments on the Draft EIS will be received until April 27, 2009.

ADDRESSES: Copies of comments and questions regarding the Draft EIS may be addressed to: U.S. Army Corps of Engineers, Wilmington District, Regulatory Division. ATTN: File Number 2005-20159, 69 Darlington Avenue, Wilmington, NC 28403. Copies of the Draft EIS can be reviewed on the Wilmington District Regulatory homepage at <http://www.saw.usace.army.mil/wetlands/projects/ww-wtp>, or contact Ms. Gwen Robinson, at (910) 251-4494, to receive written or CD copies of the Draft EIS.

FOR FURTHER INFORMATION CONTACT: Questions about the proposed action and DEIS can be directed to Mr. Henry Wicker, Project Manager, Regulatory Division, telephone: (910) 251-4930.

SUPPLEMENTARY INFORMATION:

1. *Project Description.* The proposed project consists of regional wastewater pumping, conveyance, treatment, and discharge facilities to serve the Towns of Apex, Cary, Holly Springs and Morrisville, as well as RTP South (service area), NC. The purpose of the project is to provide wastewater service for planned growth and development in the project service area and to comply with two regulatory mandates. One regulatory mandate has been issued by the North Carolina Environmental Management Commission (EMC), and the second regulatory mandate has been issued by the North Carolina Department of Environment and Natural Resources (NC DENR).

Regulatory Mandate No. 1—Interbasin Transfer: The Towns of Apex, Cary, and Morrisville, as well as Research Triangle Park (RTP) South, obtain their drinking water from Jordan Lake in the Cape Fear River Basin and discharge treated effluent to locations in the Neuse River Basin. Obtaining water from one basin and discharging it to another river basin is referred to as an interbasin transfer (IBT), which requires a permit from the EMC. In July 2001, the EMC granted the Towns of Apex, Cary, and Morrisville, as well as Wake County (on behalf of RTP South), an IBT certificate to withdraw water from the Cape Fear River Basin and discharge the water to the Neuse River Basin. However, as a condition of approval, the IBT certificate issued by the EMC requires the local governments to return reclaimed water to the Cape Fear River Basin after 2010. As a result, the local governments have initiated activities to plan, permit, design, and construct wastewater transmission, treatment, and disposal facilities in order to comply with the terms and conditions of the IBT certificate issued by the EMC. The facilities that will be described and evaluated in the environmental impact statement (DEIS) are needed to comply with the IBT certificate terms and conditions.

Regulatory Mandate No. 2—Nutrient Enrichment for Harris Lake: The Town of Holly Springs currently has a wastewater treatment plant (WWTP) that discharges to Utle Creek, which is a tributary to Harris Lake in the Cape Fear River Basin. Representatives from NCDENR have directed the Town of Holly Springs to remove the Town's wastewater discharge from Utle Creek due to nutrient enrichment issues in Utle Creek and downstream in Harris Lake. In addition, NCDENR has encouraged Holly Springs to participate with Apex, Cary and Morrisville on a regional wastewater management program that will allow Holly Springs to remove the Town's discharge from Utle Creek after 2010. Thus, Holly Springs is participating with Apex, Cary and Morrisville in the planning, permitting, design and construction of regional effluent disposal facilities in order to comply with the mandate issued by NCDENR to remove its discharge from Utle Creek. The regional effluent disposal facilities that will be described and evaluated in the DEIS are needed to comply with the NCDENR mandate.

The proposed project was reviewed to address a number of issues which includes an alternatives analysis, direct environmental impacts, secondary and cumulative environmental impacts, environmental justice concerns,
