

underscoring the high likelihood that SARs involving FBME are actually under-inclusive. Given FinCEN's concern regarding FBME's willingness to evade AML regulations that may have inhibited the identification of suspicious activity by U.S. financial institutions, a comparison of SARs filed on FBME compared to other Cypriot financial institutions would not necessarily portray the relevant risk posed by FBME.

More broadly, FinCEN notes that setting a benchmark as FBME suggests could simply set a target for banks or customers wishing to evade money laundering controls. Instead, the agency reviews relevant information and determines whether all of that information, taken together, justifies action under Section 311. FinCEN is daily immersed in the global flow of financial intelligence, including SARs, and is tasked as a policy matter with identifying concerns within that intelligence stream. As discussed above, FinCEN assesses that the volume of shell company activity reflected in the Administrative Record, including SARs filed on FBME, is substantial.
