L. 106-554; H.R. 5658) to ensure and maximize the quality of information disseminated by Federal agencies. Each Federal agency is required to issue its own set of guidelines to comply with Section 515 requirements.

The U.S. Nuclear Waste Technical Review Board (Board) is making its draft information guidelines available for public comment both in the **Federal Register** and on its Web site at [www.nwtrb.gov](http://www.nwtrb.gov). ### Draft Guidelines for Disseminating Information

#### Board Mandate

The U.S. Nuclear Waste Technical Review Board was established by Public Law 100-203, Part E, to "evaluate the technical and scientific validity of activities undertaken by the Secretary [of Energy] after the date of the enactment of the Nuclear Waste Policy Amendments Act of 1987, including: (1) [Yucca Mountain] site characterization activities; and (2) activities relating to the packaging or transporting of high-level radioactive waste or spent nuclear fuel."

To carry out its mandate, the Board strives for a high standard of quality in reviewing the U.S. Department of Energy's (DOE) technical and scientific activities. The Board holds open meetings, routinely schedules time for public comment at its meetings, and actively solicits the opinions of experts in fields allied with topics under review.

The Board also makes every effort to ensure the quality, objectivity, utility, and integrity of information that it disseminates. In developing these guidelines, the Board has followed the requirements set out by the OMB.

#### Information Disseminated by the Board

The Board was charged by Congress with providing technical and scientific advice to Congress and the Secretary of Energy based on the expert opinion of Board members. In accordance with its congressional mandate, the Board performs an evaluation of the technical and scientific validity of factual information provided by the DOE. The Board does not originate technical and scientific research or data. Consequently, information disseminated by the Board is almost without exception based on Board-member opinion. Like all expert judgments, Board opinions have a subjective element. Thus, they are not easily subjected to the tests of objectivity, reproducibility, and transparency described in the OMB guidelines.

The Board has developed the following proposed guidelines for the
