SUPPLEMENTARY INFORMATION:

Title: 7 CFR part 15 Subpart D—Data Collection Requirement.

OMB Number: 0503-0022.

Expiration Date of Approval: July 31, 2021.

Type of Request: Extension and revision of a currently approved information collection.

Abstract: Currently, Section 14006 of the 2008 Farm Bill requires the Secretary of Agriculture to annually compile for each county and State in the United States program application and participation rate data regarding socially disadvantaged farmers or ranchers for each program of USDA that serves agricultural producers or landowners. This requirement only applies to FSA, NRCS, RD, and RMA. These four agencies use the voluntary data collection form approved by OMB that is attached as a cover page to the application forms for programs that provide services to agriculture producers, farmers and ranchers. In addition, all remaining USDA agencies with conducted programs (Animal and Plant Health Inspection Service, and Foreign Agricultural Service) were required to develop a strategy for collecting voluntary REG data from individuals for their respective federally conducted programs by utilizing the same OMB approved form. Applicants and program participants of these programs and activities provide this

data on a voluntary basis. These strategies will be reviewed and approved by OASCR, who will also provide oversight and monitoring of the collection of this data through its compliance activities.

If the REG data is not collected on applicants and participants in USDA federally conducted programs, USDA will not be able to collect and report demographic data on its applicants and program participants. In addition, USDA would not be able to determine if programs and services are reaching and meeting the needs of the public, beneficiaries, partners, and other stakeholders based on demographic data.

Failure to collect this information will also have a negative impact on USDA's outreach and compliance activities. This could result in an inability to equitably deliver programs and services to applicants and producers, and ultimately an inability to hold the agencies accountable.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average two minutes per response.

Respondents: Producers, applicants, and USDA customers.

Estimated Number of Respondents: 1,200.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 40 hours.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments may be sent to Denise A. Banks, Executive Director, Center for Civil Rights Operations, Office of the Assistant Secretary for Civil Rights. All comments received will be available for

public inspection during regular business hours at the same address.

All responses to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will become a matter of public record.

Winona Lake Scott,

*Associate Assistant Secretary for Civil Rights,
Office of the Assistant Secretary for Civil Rights.*

SUPPLEMENTARY INFORMATION:

Title: Movement of Plants and Plant Products From Hawaii and the Territories.

OMB Control Number: 0579–0346.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. This authority has been delegated to the Animal and Plant Health Inspection Service (APHIS), which administers regulations to implement the PPA.

In 7 CFR part 318, under the regulations in “Subpart A—Regulated Articles from Hawaii and the Territories” (§§ 318.13–1 through 318.13–17), APHIS prohibits or restricts the interstate movement of fruits and vegetables into the continental United States from Hawaii, Puerto Rico, the U.S. Virgin Islands, Guam, and the Commonwealth of the Northern Mariana Islands to prevent plant pests and noxious weeds from being introduced into and spread within the continental United States.

The regulations contain requirements for a performance-based process for approving the interstate movement of commodities that, based on the findings of a pest risk analysis, can be safely imported subject to one or more designated phytosanitary measures and for acknowledging pest-free areas. These requirements involve information collection activities, including limited permits, inspections to issue limited permits, inspections of production areas, transit permits, compliance agreements, inspection and certification, labeling for fruits and vegetables produced in pest free areas, written requests for facility approvals, trapping

and surveillance, and recordkeeping. In addition, the activities of packaging, marking, identification, and certification of sweet potatoes from Hawaii are also included.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 0.21 hours per response.

Respondents: Wholesalers and producers of fruits and vegetables; growers, shippers, and exporters in Hawaii, U.S. Territories, and State plant regulatory officials; and irradiation facility personnel.

Estimated annual number of respondents: 283.

Estimated annual number of responses per respondent: 55.

Estimated annual number of responses: 15,673.

Estimated total annual burden on respondents: 3,286 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 27th day of May 2021.

Mark Davidson,

Acting Administrator, Animal and Plant Health Inspection Service.
