#### SUPPLEMENTARY INFORMATION:

*Title:* Plant Pest, Noxious Weed, and Garbage Regulations.

*OMB Number:* 0579-0054.

*Expiration Date of Approval:* February 29, 2000.

*Type of Request:* Extension of approval of an information collection.

*Abstract:* The Plant Protection and Quarantine (PPQ) program of the Animal and Plant Health Inspection Service (APHIS), U. S. Department of Agriculture, is responsible for preventing plant pests and noxious weeds from entering the United States, preventing the spread of pests and weeds not widely distributed in the United States, and eradicating those introduced pests and weeds when eradication is feasible. PPQ is also responsible for preventing plant and animal diseases and pests from entering the United States in waste material derived from, or associated with, fruits, vegetables, meats, or other plant or animal matter commonly referred to as garbage.

The introduction and establishment of new plant and animal pests and diseases or noxious weeds in the United States could cause multimillion dollar losses to U.S. agriculture.

To prevent this from happening, we engage in a number of information collection activities under 7 CFR parts 330 and 360, and 9 CFR part 94, § 94.5, that are designed to allow us to determine whether shipments of regulated articles (such as certain plants and soil) represent a possible risk of introducing or disseminating plant pests or noxious weeds into the United States.

Our primary means of obtaining this vital information is requiring individuals to apply to us for a permit to import regulated articles or to move
