

construction, 9.1 miles of trail co-designated on existing roads, 5.1 miles of trails being un-designated, and 18.7 miles of trail remaining on the system.

Preliminary connectivity corridors have been identified between late and old structure stands to allow for movement of old-growth dependent species. The goal of creating "connectivity" is to manage stands in corridors at higher canopy densities when compared to more intensively managed stands located outside of corridors.

The Ragged Ruby Project will also include a variety of project design criteria that serve to mitigate impacts of activities to forest resources, including wildlife, soils, watershed condition, aquatic species, riparian habitat conservation areas, heritage resources, visuals, rangeland, botanical resources, and invasive plants. The proposed action may also include amendments to the Malheur National Forest Land and Resource Management Plan, as amended: dedicated old growth unit changes, reduce satisfactory and/or total cover, removal of trees greater than or equal to 21 inches diameter at breast height, and harvest within late and old structure stands.

Possible Alternatives

The Forest Service will consider a range of alternatives. One of these will be the "no action" alternative in which none of the proposed action would be implemented. Additional alternatives may be included in response to issues raised by the public during the scoping process or due to additional concerns for resource values identified by the interdisciplinary team.

Responsible Official

The Forest Supervisor of the Malheur National Forest, 431 Patterson Bridge Road, John Day, OR 97845, is the Responsible Official. As the Responsible Official, I will decide if the proposed action will be implemented. I will document the decision and rationale for the decision in the Record of Decision. I have delegated the responsibility for preparing the draft EIS and final EIS to the District Ranger, Blue Mountain Ranger District.

Nature of Decision To Be Made

Based on the purpose and need, the Responsible Official reviews the proposed action, the other alternatives, the environmental consequences, and public comments on the analysis in order to make the following decision: (1) Whether to implement the proposed activities; and if so, how much and at what specific locations; (2) What, if any,

specific project monitoring requirements are needed to assure project design criteria and mitigation measures are implemented and effective, and to evaluate the success of the project objectives.

Scoping Process

This notice of intent initiates the scoping process, which guides the development of the environmental impact statement. The interdisciplinary team will continue to seek information and comments from Federal, State, and local agencies, Tribal governments, and other individuals or organizations that may be interested in, or affected by, the proposed action. There is a collaborative group in the area that the interdisciplinary team will interact with during the analysis process.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions.

Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered, however.

Dated: March 17, 2017.

Jeanne M. Higgins,

Associate Deputy Chief, National Forest System.

Nez Perce-Clearwater National Forests; Idaho; Nez Perce-Clearwater National Forests Clear Creek Integrated Restoration Project

AGENCY: Forest Service, USDA.

ACTION: Notice of Intent (NOI) to prepare a Supplemental Environmental Impact Statement (SEIS) for the Clear Creek Integrated Restoration Project.

SUMMARY: The U.S. Forest Service is giving notice of its intent to prepare a SEIS for the Clear Creek Integrated Restoration Project on the Moose Creek Ranger District of the Nez Perce-Clearwater National Forests, Idaho. Cheryl Probert, Forest Supervisor, has withdrawn the February 2016 Record of

Decision (ROD) for this project. Supervisor Probert plans to prepare a SEIS to further review the project alternatives and analysis, to correct and update information that was presented in the Final Environmental Impact Statement (FEIS), and to consider information that has become available since the FEIS was published in September 2015.

Authority: This NOI is being published pursuant to regulations (40 CFR 1508.22) implementing the procedural provisions of the National Environmental Policy Act (NEPA) of 1969, as amended (42 U.S.C. 4321 *et seq.*).

Scoping: A NOI published on January 6, 2012 initiated the scoping period for the Clear Creek Integrated Restoration Project. A legal notice advertising the start of a 30-day scoping period was advertised in the Lewiston, Idaho *Lewiston Tribune* on December 30, 2011. In accordance with 40 CFR 1502.9(c)(4), there will be no scoping conducted for this SEIS. The scope of the Clear Creek Integrated Restoration FEIS established the scope for this SEIS.

The SEIS will be advertised for public comment as required by 40 CFR 1503.1. The Draft SEIS will be announced for public review and comment in the **Federal Register**, on the Nez Perce-Clearwater National Forests' project Web site, and in the Lewiston, Idaho *Lewiston Tribune*, as well as other local media.

FOR FURTHER INFORMATION CONTACT: Lois Hill, Environmental Coordinator, (208) 935-4258.

SUPPLEMENTARY INFORMATION: The US Forest Service is announcing its intent to prepare a SEIS for the Clear Creek Integrated Restoration Project. The SEIS will supplement the analysis from the Clear Creek Integrated Restoration FEIS (2015) by providing an updated analysis of the environmental effects. The Clear Creek Integrated Restoration FEIS evaluated the potential effects of four alternatives, including No Action and three action alternatives.

The Nez Perce-Clearwater Forest Supervisor will issue a new ROD after evaluating the SEIS and public comments. An objection period for the new ROD will be provided, consistent with 36 CFR part 218.

Responsible Official and Lead Agency

The USDA Forest Service is the lead agency for this proposal. The Nez Perce-Clearwater Forest Supervisor is the responsible official.

Nature of Decision To Be Made

Whether to adopt the proposed action, in whole or in part, or another

alternative; and what mitigation measures and management requirements will be implemented.

Dated: March 17, 2017.

Jeanne M. Higgins,

Associate Deputy Chief, National Forest System.
