

provisions that conflict. If these requirements are not observed, FHA may insure a mortgage that fails to comply with statutory and regulatory requirements established to protect the interest of the government. For each mortgage, the lender or designee must provide the name of the mortgagor, the legal description of the property, and the term and rate of the mortgage to be insured. A lender must develop or procure mortgage and note forms that comply with both HUD and applicable state and local requirements for a recordable and enforceable mortgage. Proof of recoding is often found on the document; a recorded document normally has a seal or other marking that indicates where it may be found in the land records. Either proof of recordation or a certified copy of the document with the recordation seal will meet this requirement.

Agency form numbers, if applicable: None.

Estimation of the total numbers of hours needed to prepare the information collection including number of respondents, frequency of response, and hours of response: The frequency of response is one document per loan and the total number of burden hours for entry is 30 minutes per endorsed case. The total number of responses is 1,623,947 which represent the total number of FHA cases endorsed. The total number of burden hours is estimated at 811,973 which represent the time required to prepare the required documents for FHA cases insured.

Status of the proposed information collection: This is an extension of a currently approved collection.
