Russian Federation Effective July 1,
2009**

June 16, 2009.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner, U.S. Customs and Border Protection, terminating the textile visa arrangement with Russia for Category 435, women's and girls' wool coats.

EFFECTIVE DATE: July 1, 2009.

FOR FURTHER INFORMATION CONTACT: Maria D'Andrea, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482-4058.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

In a notice and letter published in the **Federal Register** on January 31, 1997 (see 62 FR 4729), the United States established visa requirements for women's and girls' wool coats in Category 435 manufactured in the Russian Federation and exported from

Russia on and after March 1, 1997. Because textile and apparel imports into the United States of America from the Russian Federation are no longer subject to quota restrictions, there is no need to maintain the visa requirements.

Accordingly, pursuant to the Visa Arrangement between the Governments of the United States of America and the Russian Federation that was signed on October 22, 1996 and December 31, 1996, CITA has notified the Russian Federation that it is terminating visa requirements for women's and girls' wool coats in Category 435.

In the letter below, CITA is directing U.S. Customs and Border Protection to terminate the visa requirement for women's and girls' wool coats in Category 435 exported from Russia effective July 1, 2009.

Acting Chairman, Committee for the Implementation of Textile Agreements.

ACTION: Notice; issuance of permit modification.

Witherington, Ph.D., Florida Fish and Wildlife Conservation Commission, Fish and Wildlife Research Institute, Melbourne Beach Field Laboratory, 9700 South A1A, Melbourne Beach, FL 32951, has been issued a modification to scientific research Permit No. 1506-01.

FOR FURTHER INFORMATION CONTACT:

Amy Hapeman or Patrick Opay, (301)713-2289.

SUPPLEMENTARY INFORMATION:

On November 26, 2008, notice was published in the **Federal Register** (73 FR 72027) that a modification of Permit No. 1506-01, issued June 1, 2006 (71 FR 31165), had been requested by the above-named individual. The requested modification has been granted under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

Permit No. 1506-01 authorizes the permit holder to study neonate and juvenile loggerhead (*Caretta caretta*), green (*Chelonia mydas*), Kemp's ridley (*Lepidochelys kempii*), hawksbill (*Eretmochelys imbricata*) and leatherback (*Dermochelys coriacea*) sea turtles in the waters of the Gulf of Mexico and the Atlantic Ocean off the coast of Florida. The purpose of the research is to identify developmental habitat, evaluate the extent of ingestion of marine debris, and provide insight into juvenile sea turtle movements and dive patterns. Dr. Witherington may capture up to 250 loggerhead, 100 green, 50 hawksbill, 50 Kemp's ridley, and 10 leatherback sea turtles by handheld dip nets annually. All turtles are measured and released. A subset of green and loggerhead turtles may be transported to a lab and examined with high resolution magnetic resonance interferometry or computerized tomography, held for 3-4 days and released to determine their level of anthropogenic debris ingestion. Annually, four of each species of green, hawksbill, and Kemp's ridley sea turtles may have sonic transmitters and data loggers attached to measure movements and dive patterns, be recaptured after 24 hours to remove the transmitter and released.

The modification authorizes researchers to conduct the following activities annually on turtles authorized for capture: flipper and passive integrated transponder tag all animals,
