

the scoping process and the comment period initiated by this notice of intent in the preparation of the EIS.

BOEM will use the NEPA commenting process to satisfy the public comment requirements of the National Historic Preservation Act (54 U.S.C. 306108), as provided for in 36 CFR 800.2(d)(3).

Cooperating Agencies: BOEM invites qualified government entities such as other Federal agencies, State, Tribal, and local governments, to consider becoming cooperating agencies for the preparation of the Cook Inlet Lease Sale 258 EIS. Following the guidelines at 40 CFR 1501.6 and 1508.5 from the Council on Environmental Quality (CEQ), qualified agencies and governments are those with “jurisdiction by law or special expertise.” Potential cooperating agencies should consider their authority and capacity to assume the responsibilities of a cooperating agency and remember that an agency’s role in the environmental analysis neither enlarges nor diminishes the final decision-making authority of any other agency involved in the NEPA process. Upon request, BOEM will provide potential cooperating agencies with a written summary of guidelines for cooperating agencies, including time schedules and critical action dates, milestones, responsibilities, and scope and detail of cooperating agencies’ contributions. BOEM anticipates this summary will form the basis for a Memorandum of Understanding between BOEM and any cooperating agency. BOEM, as the lead agency, will not provide financial assistance to cooperating agencies. In addition to becoming a cooperating agency, other opportunities will exist to provide information and comments to BOEM during the public comment period for the Cook Inlet Lease Sale 258 EIS. For additional information about cooperating agencies, please contact Ameer Howard, Project Manager, BOEM Office of Environment (907–334–5200).

Authority: This notice of intent is published pursuant to the regulations at 40 CFR 1501.7 implementing the provisions of NEPA.

[Docket Nos. 50-456; 50-457; NRC-2020-0208]

Exelon Generation Company, LLC; Braidwood Station, Units 1 and 2

AGENCY: Nuclear Regulatory Commission.

ACTION: Environmental assessment and finding of no significant impact; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is considering

issuance of an amendment to Renewed Facility Operating License Nos. NPF-72 and NPF-77 that were issued to Exelon Generation Company, LLC, (licensee) for operation of the Braidwood Station, Units 1 and 2. The proposed amendment is contained in the licensee's letter dated July 15, 2020, as supplemented by letter dated August 14, 2020, and would change technical specifications (TS) surveillance requirement (SR) 3.7.9.2 to allow an ultimate heat sink (UHS) temperature of less than or equal to 102.8 degrees Fahrenheit (°F) until September 30, 2020. The proposed amendment would also permanently extend the completion time for the Required Action of both Braidwood Station, Units 1 and 2, to be placed in Mode 3 within 12 hours when the UHS is inoperable due to the average water temperature.

DATES: The environmental assessment and finding of no significant impact referenced in this document is available on September 10, 2020.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is considering issuance of amendments to Renewed Facility Operating License Nos. NPF-72 and NPF-77 that were issued to Exelon Generation Company, LLC (Exelon), for operation of the Braidwood Station, Units 1 and 2 (Braidwood), located in Will County Illinois. Exelon submitted its license amendment request in accordance with section 50.90 of title 10 of the *Code of Federal Regulation* (10 CFR), by letter dated July 15, 2020 (ADAMS Accession No. ML20197A434) as supplemented by letter dated August 14, 2020 (ADAMS Accession No. ML20227A375). If approved, the license amendments would revise TS surveillance requirement (SR) in TS 3.7.9.2 to allow a temporary increase in the allowable ultimate heat sink (UHS) average temperature of less than or equal to (\leq) 102.8 degrees Fahrenheit (°F) (39.3 degrees Celsius (°C)) through September 30, 2020. The amendments would also permanently extend the completion time for TS 3.7.9 Required Action A.1, which requires Exelon to place Braidwood in hot standby (Mode 3), from 6 hours to 12 hours when the UHS is inoperable due to the average water temperature. The completion time for placing Braidwood in hot standby for all other reasons would remain 6 hours.

Therefore, as required by 10 CFR 51.21, the NRC performed an environmental assessment (EA). Based on the results of the EA assessment that follows, the NRC has determined not to prepare an environmental impact statement for the proposed amendments, and is issuing a finding of no significant impact (FONSI).

Plant Site and Environs

Braidwood is located in Will County, Illinois approximately 50 miles (mi; 80 kilometers [km]) southwest of the Chicago Metropolitan Area and 20 mi (32 km) south-southwest of Joliet. The Kankakee River is approximately 5 mi (8 km) east of the eastern site boundary. An onsite 2,540-acre (ac; 1,030-hectare [ha]) cooling pond provides condenser cooling. Cooling water is withdrawn from the pond through the lake screen house, which is located at the north end of the pond. Heated water returns to the cooling pond through a discharge canal west of the lake screen house intake that is separated from the intake by a dike. The pond typically holds 22,300 acre-
