Magnuson-Stevens Fishery Conservation and Management Act Provisions; Fisheries of the Northeastern United States; Northeast Multispecies Fishery; Fishing Year 2025 Measures

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; emergency action; request for comments.

SUMMARY: This temporary rule implements emergency measures under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) to revise portions of the fishing year 2025 provisions in the Northeast Multispecies Fishery Management Plan (FMP). This action is necessary to address an emergency presented by a gap of approved specifications and other measures for fishing year 2025, based on the most recent fisheries data and scientific information, during consideration of two actions to the amend the FMP that would transition conservation and management of Atlantic cod from two biological stock units to four biological stock units. This temporary rule is intended to mitigate economic harm to the Northeast multispecies fishery participants by establishing fish stock quotas and related measures that allow the fishery to operate while preventing overfishing.

DATES: This action is effective May 1, 2025, through October 28, 2025. Comments must be received by June 2, 2025.

ADDRESSES: NMFS developed a Supplemental Impact Report (SIR) for the Environmental Assessments (EA) for Framework Adjustments 65 and 66 to the Northeast Multispecies FMP that describes the impact that the measures in this temporary rule would have on the human environment. Copies of the SIR and the Regulatory Impact Review of this rulemaking are available on the internet at: <https://www.fisheries.noaa.gov/region/new-england-mid-atlantic>.
