

Changes in the Estimates: There is a decrease of 3,945 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is a result of EPA phasing out the Title II Construction Grants Program, and State Delegation of this program, due to the establishment of a State Revolving Loan Fund program.

Expiration Date: 12/31/05.

Title: Compatibility of Wireless Services with Enhanced 911; Second Report and Order in CC Docket No. 94-102.

Form No.: N/A.

Respondents: Individuals or households, business or other for-profit, state, local, or tribal governments, not for profit institutions.

Description: The information submitted by manufacturers or carriers wishing to incorporate new or modified E911 call processing modes will be used to keep the Commission informed of technological developments and thus to ensure that the Commission's regulations are kept current and reflect the preferences of the industry in complying with E911 call completion regulations. OMB Control No.: 3060-0813.

Expiration Date: 6/30/05.

Title: Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Services.

Form No.: N/A.

Respondents: Business or other for-profit, state, local, or tribal governments.

Responses: 47,031.

Estimated Time Per Response: 1 to 5 hours.

Estimated Total Annual Burden: 198,200 hours.

Total Annual Cost: 0.

Description: The notification burden on Public Safety Answering Points

(PSAPs) will be used by the carriers to verify that wireless E911 calls are referred to PSAPs who have the technical capability to use the data to the caller's benefit. TTU and dispatch notification requirements will be used to avoid consumer confusion as to the capabilities of their handsets in reaching help in emergency situations, thus minimizing the possibility of critical delays in response time. The annual TTY reports will be used to monitor the progress of TTY technology and thus compatibility. Consultations on the specific meaning assigned to pseudo-ANI are appropriate to ensure that all parties are working with the same information. Coordination between carriers and State and local entities to determine the appropriate PSAPs to receive and respond to E911 calls is necessary because of the difficulty in assigning PSAPs based on the location of the wireless caller. The deployment schedule that must be submitted by carriers seeking a waiver of Phase I or Phase II deployment schedule will be used by the Commission to guarantee that the rules adopted in this proceeding are enforced in as timely a manner as possible within technological constraints.

November 2, 2000), parties filed petitions to reconsider certain aspects of the satellite program exclusivity rules adopted therein. In its Order on Reconsideration in the same docket, FCC 02-287 (rel. October 17, 2002), the Commission denied petitions to extend the phase-in period for implementation of the rules, and also maintained the application of the sports blackout rule to satellite carriage of network stations.

The Commission revised section 76.122(c)(2), pertaining to identification of information about programming to be deleted, so that the satellite rule conforms to the cable rules. In addition, the Commission clarified and amended section 76.127(c), pertaining to notifications of deletions for sports broadcasts, to permit sports rights holders with a discernable season to submit blackout notifications for an entire season, but also to establish a date certain by when those notifications must be received by satellite carriers.
