BILLING CODE 3410-11; 4310-55-P

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric
Administration****50 CFR Part 229**[Docket No. 030221039-4247-13; I.D.
082404A]**Taking of Marine Mammals Incidental
to Commercial Fishing Operations;
Atlantic Large Whale Take Reduction
Plan (ALWTRP)****AGENCY:** National Marine Fisheries
Service (NMFS), National Oceanic and
Atmospheric Administration (NOAA),
Commerce.**ACTION:** Temporary rule.**SUMMARY:** The Assistant Administrator
for Fisheries (AA), NOAA, announces
temporary restrictions consistent with
the requirements of the ALWTRP's
implementing regulations. These
regulations apply to lobster trap/pot and
anchored gillnet fishermen in an area
totaling approximately 2,600 square
nautical miles (nm²) (8,918 km²), east of
Cape Ann, MA, for 15 days. The
purpose of this action is to provide
protection to an aggregation of North
Atlantic right whales (right whales).**DATES:** Effective beginning at 0001 hours
September 2, 2004, through 2400 hours
September 16, 2004.**ADDRESSES:** Copies of the proposed and
final Dynamic Area Management (DAM)
rules, Environmental Assessments
(EAs), Atlantic Large Whale Take
Reduction Team (ALWTRT) meeting
summaries, and progress reports on
implementation of the ALWTRP may
also be obtained by writing Diane
Borggaard, NMFS/Northeast Region,
One Blackburn Drive, Gloucester, MA
01930.**FOR FURTHER INFORMATION CONTACT:**
Diane Borggaard, NMFS/Northeast
Region, 978-281-9328 x6503; or Kristy
Long, NMFS, Office of Protected
Resources, 301-713-1401.**SUPPLEMENTARY INFORMATION:****Electronic Access**Several of the background documents
for the ALWTRP and the take reduction
planning process can be downloaded
from the ALWTRP Web site at [http://
www.nero.noaa.gov/whaletrp/](http://www.nero.noaa.gov/whaletrp/).**Background**The ALWTRP was developed
pursuant to section 118 of the Marine
Mammal Protection Act (MMPA) to
reduce the incidental mortality and
serious injury of three endangered
species of whales (right, fin, and
humpback) as well as to provide
conservation benefits to a fourth non-
endangered species (minke) due to
incidental interaction with commercial
fishing activities. The ALWTRP,
implemented through regulations
codified at 50 CFR 229.32, relies on a
combination of fishing gear
modifications and time/area closures to
reduce the risk of whales becoming
entangled in commercial fishing gear
(and potentially suffering serious injury
or mortality as a result).On January 9, 2002, NMFS published
the final rule to implement the
ALWTRP's DAM program (67 FR 1133).
On August 26, 2003, NMFS amended
the regulations by publishing a final
rule, which specifically identified gear
modifications that may be allowed in a
DAM zone (68 FR 51195). The DAM
program provides specific authority for
NMFS to restrict temporarily on an
expedited basis the use of lobster trap/
pot and anchored gillnet fishing gear in
areas north of 40° N. lat. to protect right
whales. Under the DAM program,
NMFS may: (1) require the removal of
all lobster trap/pot and anchored gillnet
fishing gear for a 15-day period; (2)
allow lobster trap/pot and anchored
gillnet fishing within a DAM zone with
gear modifications determined by NMFS
to sufficiently reduce the risk of
entanglement; and/or (3) issue an alert
to fishermen requesting the voluntary
removal of all lobster trap/pot and
anchored gillnet gear for a 15-day
period and asking fishermen not to set
any additional gear in the DAM zone
during the 15-day period.A DAM zone is triggered when NMFS
receives a reliable report from a
qualified individual of three or more
right whales sighted within an area (75
nm² (139 km²)) such that right whale
density is equal to or greater than 0.04
right whales per nm² (1.85 km²). A
qualified individual is an individual
ascertained by NMFS to be reasonably
able, through training or experience, to
identify a right whale. Such individuals
include, but are not limited to, NMFS
staff, U.S. Coast Guard and Navypersonnel trained in whale
identification, scientific research survey
personnel, whale watch operators and
naturalists, and mariners trained in
whale species identification through
disentanglement training or some other
training program deemed adequate by
NMFS. A reliable report would be a
credible right whale sighting.On August 17, 2004, NMFS received
a report of two groups of right whales,
totaling 15 animals, in the proximity of
42°55' N lat. and 69°00' W long. This
position lies east of Cape Ann, MA.
After conducting an investigation, the
Northeast Fisheries Science Center
ascertained that the report came from a
qualified individual and determined
that the report was reliable.Once a DAM zone is triggered, NMFS
determines whether to impose
restrictions on fishing and/or fishing
gear in the zone. This determination is
based on the following factors,
including but not limited to: the
location of the DAM zone with respect
to other fishery closure areas, weather
conditions as they relate to the safety of
human life at sea, the type and amount
of gear already present in the area, and
a review of recent right whale
entanglement and mortality data.NMFS has reviewed the factors and
management options noted above
relative to the DAM under
consideration. As a result of this review,
NMFS prohibits lobster trap/pot and
anchored gillnet gear in this area during
the 15-day restricted period unless it is
modified in the manner described in
this temporary rule. The DAM zone is
bounded by the following coordinates:43°20' N, 69°24' W (NW Corner)
43°20' N, 68°36' W
42°05' N, 68°36' W
42°05' N, 69°24' WIn addition to those gear
modifications currently implemented
under the ALWTRP at 50 CFR 229.32,
the following gear modifications are
required in the DAM zone. If the
requirements and exceptions for gear
modification in the DAM zone, as
described below, differ from other
ALWTRP requirements for any
overlapping areas and times, then the
more restrictive requirements will apply
in the DAM zone. Special note for
gillnet fisherman: This DAM zone
overlaps the year round Cashes Ledge
Closure Area. This DAM action does not
supersede Northeast multispecies
closures found at 50 CFR 648.81.**Lobster Trap/Pot Gear**Fishermen utilizing lobster trap/pot
gear within the portion of the Northern
Nearshore Lobster Waters that overlap
with the DAM zone are required to

utilize all of the following gear modifications while the DAM zone is in effect:

1. Groundlines must be made of either sinking or neutrally buoyant line.

Floating groundlines are prohibited;

2. All buoy lines must be made of either sinking or neutrally buoyant line, except the bottom portion of the line, which may be a section of floating line not to exceed one-third the overall length of the buoy line;

3. Fishermen are allowed to use two buoy lines per trawl; and

4. A weak link with a maximum breaking strength of 600 lb (272.4 kg) must be placed at all buoys.

Fishermen utilizing lobster trap/pot gear within the portion of the Offshore Lobster Waters Area and the Great South Channel Restricted Lobster Area that overlap with the DAM zone are required to utilize all of the following gear modifications while the DAM zone is in effect:

1. Groundlines must be made of either sinking or neutrally buoyant line.

Floating groundlines are prohibited;

2. All buoy lines must be made of either sinking or neutrally buoyant line, except the bottom portion of the line, which may be a section of floating line not to exceed one-third the overall length of the buoy line;

3. Fishermen are allowed to use two buoy lines per trawl; and

4. A weak link with a maximum breaking strength of 1,500 lb (680.4 kg) must be placed at all buoys.

Anchored Gillnet Gear

Fishermen utilizing anchored gillnet gear within the portion of the Other Northeast Gillnet Waters and the Great South Channel Restricted Gillnet Area that overlap with the DAM zone are required to utilize all the following gear modifications while the DAM zone is in effect:

1. Groundlines must be made of either sinking or neutrally buoyant line.

Floating groundlines are prohibited;

2. All buoy lines must be made of either sinking or neutrally buoyant line, except the bottom portion of the line, which may be a section of floating line not to exceed one-third the overall length of the buoy line;

3. Fishermen are allowed to use two buoy lines per string;

4. Each net panel must have a total of five weak links with a maximum breaking strength of 1,100 lb (498.8 kg). Net panels are typically 50 fathoms (91.4 m) in length, but the weak link requirements would apply to all variations in panel size. These weak links must include three floatline weak links. The placement of the weak links

on the floatline must be: one at the center of the net panel and one each as close as possible to each of the bridle ends of the net panel. The remaining two weak links must be placed in the center of each of the up and down lines at the panel ends; and

5. All anchored gillnets, regardless of the number of net panels, must be securely anchored with the holding power of at least a 22-lb (10.0-kg) Danforth-style anchor at each end of the net string.

The restrictions will be in effect beginning at 0001 hours September 2, 2004, through 2400 hours September 16, 2004, unless terminated sooner or extended by NMFS through another notification in the **Federal Register**.

The restrictions will be announced to state officials, fishermen, ALWTRT members, and other interested parties through e-mail, phone contact, NOAA website, and other appropriate media immediately upon filing with the **Federal Register**.

Classification

In accordance with section 118(f)(9) of the Marine Mammal Protection Act, the Assistant Administrator (AA) for Fisheries has determined that this action is necessary to implement a take reduction plan to protect North Atlantic right whales.

Environmental Assessments for the DAM program were prepared on December 28, 2001, and August 6, 2003. This action falls within the scope of the analyses of these EAs, which are available from the agency upon request.

NMFS provided prior notice and an opportunity for public comment on the regulations establishing the criteria and procedures for implementing a DAM zone. Providing prior notice and opportunity for comment on this action, pursuant to those regulations, would be impracticable because it would prevent NMFS from executing its functions to protect and reduce serious injury and mortality of endangered right whales. The regulations establishing the DAM program are designed to enable the agency to help protect unexpected concentrations of right whales. In order to meet the goals of the DAM program, the agency needs to be able to create a DAM zone and implement restrictions on fishing gear as soon as possible once the criteria are triggered and NMFS determines that a DAM restricted zone is appropriate. If NMFS were to provide prior notice and an opportunity for public comment upon the creation of a DAM restricted zone, the aggregated right whales would be vulnerable to entanglement which could result in serious injury and mortality.

Additionally, the right whales would most likely move on to another location before NMFS could implement the restrictions designed to protect them, thereby rendering the action obsolete.

Therefore, pursuant to 5 U.S.C. 553(b)(B), the AA finds that good cause exists to waive prior notice and an opportunity to comment on this action to implement a DAM restricted zone to reduce the risk of entanglement of endangered right whales in commercial lobster trap/pot and anchored gillnet gear as such procedures would be impracticable.

For the same reasons, the AA finds that, under 5 U.S.C. 553(d)(3), good cause exists to waive the 30-day delay in effective date. If NMFS were to delay for 30 days the effective date of this action, the aggregated right whales would be vulnerable to entanglement, which could cause serious injury and mortality. Additionally, right whales would likely move to another location between the time NMFS approved the action creating the DAM restricted zone and the time it went into effect, thereby rendering the action obsolete and ineffective. Nevertheless, NMFS recognizes the need for fishermen to have time to either modify or remove (if not in compliance with the required restrictions) their gear from a DAM zone once one is approved. Thus, NMFS makes this action effective 2 days after the date of publication of this notice in the **Federal Register**. NMFS will also endeavor to provide notice of this action to fishermen through other means as soon as the AA approves it, thereby providing approximately 3 additional days of notice while the Office of the **Federal Register** processes the document for publication.

NMFS determined that the regulations establishing the DAM program and actions such as this one taken pursuant to those regulations are consistent to the maximum extent practicable with the enforceable policies of the approved coastal management program of the U.S. Atlantic coastal states. This determination was submitted for review by the responsible state agencies under section 307 of the Coastal Zone Management Act. Following state review of the regulations creating the DAM program, no state disagreed with NMFS' conclusion that the DAM program is consistent to the maximum extent practicable with the enforceable policies of the approved coastal management program for that state.

The DAM program under which NMFS is taking this action contains policies with federalism implications warranting preparation of a federalism assessment under Executive Order

13132. Accordingly, in October 2001 and March 2003, the Assistant Secretary for Intergovernmental and Legislative Affairs, DOC, provided notice of the DAM program and its amendments to the appropriate elected officials in states to be affected by actions taken pursuant to the DAM program. Federalism issues raised by state officials were addressed in the final rules implementing the DAM program. A copy of the federalism Summary Impact Statement for the final rules is available upon request (ADDRESSES).

The rule implementing the DAM program has been determined to be not significant under Executive Order 12866.

Authority: 16 U.S.C. 1361 *et seq.* and 50 CFR 229.32(g)(3)

Dated: August 25, 2004.

William T. Hogarth,

*Assistant Administrator for Fisheries,
National Marine Fisheries Service.*

BILLING CODE 3510-22-S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[I.D. 082404C]

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish Fishery of the Gulf of Mexico; Closure of the Spring Commercial Red Snapper Component

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of closure.

SUMMARY: NMFS closes the commercial fishery for red snapper in the exclusive economic zone (EEZ) of the Gulf of Mexico. NMFS has determined that the spring portion of the annual commercial quota for red snapper was reached on August 10, 2004. This closure is necessary to protect the red snapper resource.

DATES: Closure is effective from noon, local time, August 10, 2004, until noon, local time, on October 1, 2004.

FOR FURTHER INFORMATION CONTACT: Phil Steele, telephone 727-570-5305, fax 727-570-5583, e-mail Phil.Steele@noaa.gov.

SUPPLEMENTARY INFORMATION: The reef fish fishery of the Gulf of Mexico is managed under the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (FMP). The FMP was prepared by the Gulf of Mexico Fishery Management Council and is implemented under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) by regulations at 50 CFR part 622. Those regulations set the commercial quota for red snapper in the Gulf of Mexico at 4.65 million lb (2.11 million kg) for the current fishing year, January 1 through December 31, 2004. The red snapper commercial fishing season is split into two time periods, the first commencing at noon on February 1 with two-thirds of the annual quota (3.10 million lb (1.41 million kg)) available, and the second commencing at noon on October 1 with the remaining one-third of the annual quota (1.55 million lb (0.70 million kg)) available. During the commercial fishing season, the red snapper fishery opens at noon on the first of each month and closes at noon on the 10th of each month, until the applicable commercial quotas are reached.

Under 50 CFR 622.43(a), NMFS is required to close the commercial fishery for a species or species group when the quota for that species or species group is reached, or is projected to be reached, by filing a notification to that effect in the **Federal Register**. Based on current statistics, NMFS has determined that the available spring commercial quota of 3.10 million lb (1.41 million kg) for red snapper was reached when the fishery closed at noon on August 10, 2004. Accordingly, the commercial fishery in the EEZ in the Gulf of Mexico for red snapper will remain closed until noon, local time, on October 1, 2004. The operator of a vessel with a valid reef fish permit having red snapper aboard must have landed and bartered, traded, or sold such red snapper prior to noon, local time, August 10, 2004.

During the closure, the bag and possession limits specified in 50 CFR 622.39(b) apply to all harvest or possession of red snapper in or from the EEZ in the Gulf of Mexico, and the sale

or purchase of red snapper taken from the EEZ is prohibited. In addition, the bag and possession limits for red snapper apply on board a vessel for which a commercial permit for Gulf reef fish has been issued, without regard to where such red snapper were harvested. However, the bag and possession limits for red snapper apply only when the recreational quota for red snapper has not been reached and the bag and possession limit has not been reduced to zero. The 2004 recreational red snapper season opened on April 21, 2004 and will close on October 31, 2004. The prohibition on sale or purchase does not apply to the sale or purchase of red snapper that were harvested, landed ashore, and sold prior to noon, local time, August 10, 2004, and were held in cold storage by a dealer or processor.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA, finds that the need to immediately implement this action to close the fishery constitutes good cause to waive the requirements to provide prior notice and opportunity for public comment pursuant to the authority set forth in 5 U.S.C. 553(b)(3)(B), as such procedures would be unnecessary and contrary to the public interest. Similarly, there is a need to implement these measures in a timely fashion to prevent an overrun of the commercial quota of Gulf red snapper, given the capacity of the fishing fleet to harvest the quota quickly. Any delay in implementing this action would be impractical and contrary to the Magnuson-Stevens Act, the FMP, and the public interest. NMFS finds for good cause that the implementation of this action cannot be delayed for 30 days. Accordingly, under 5 U.S.C. 553(d), a delay in the effective date is waived.

This action is taken under 50 CFR 622.43(a) and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 24, 2004.

Alan D. Risenhoover,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
