

studies conducted in the late 1960s and 1970s require updating and revision to provide the most current information. Additionally, the pilot study indicates that there is a need for a broader base of data.

The results of this research should help agency personnel manage the land more effectively and work more cooperatively with livestock grazing permittees. Such information may also serve to improve agency relations with area communities by promoting greater understanding of the local culture and the role of livestock ownership in that culture. As the public becomes more involved in the federal land management decision-making process, the need for public education on the relationship between land and the rural way of life increases.

To collect the required information, social science researchers from the Rocky Mountain Research Station, USDA Forest Service will personally administer a questionnaire to grazing permittees from the Santa Fe and Carson National Forests. Respondents who are unable to schedule an interview will have the option of returning their completed questionnaire by mail.

The data collected will describe the economic, social, and cultural contributions of livestock operations to grazing permittees including: (1) Background information on the permittee and his/her family; (2) background information on the livestock operation; (3) contribution of the livestock operation to the household economy; (4) contribution of the livestock operation to the cultural, and lifestyle; (5) land use values of the family and community. After completing the information collection, researchers will compile and analyze the data.

The compiled data from this study will be used to assist managers on the two forests to work more effectively with grazing permittees by encouraging increased intercultural understanding. Additionally, the collected information may be used in developing and updating grazing allotment plans and in developing forest plan revisions. This type of information is also valuable in public education programs concerning the rural culture of northern New Mexico. The results of this study will also serve as the foundation for multiple research publications.

Since this study is designed to provide information on small-scale livestock operations on Federal allotments, its implementation is of considerable importance. If this data is not collected, grazing allotment plans and forest plan revisions for the target

forests will not be based on the most current and appropriate socio-cultural and economic information. Furthermore, agency relations with the community may be hindered from a lack of knowledge that might otherwise help to promote intercultural understanding and cooperation.

Estimate of Annual Burden: One and a half hours.

Type of Respondents: Livestock ranchers/owners who have permits to graze cattle or sheep on the Santa Fe and Carson National Forests in northern New Mexico.

Estimated Annual Number of Respondents: 600 respondents.

Estimated Annual Number of Responses per Respondent: One time. This is a one-time collection of information.

Estimated Total Annual Burden on Respondents: 900 total hours. This is a one-time collection of information.

Comment Is Invited

Comment is invited on: (1) Whether this collection of information is necessary for the stated purposes and the proper performance of the functions of the agency, including whether the information will have practical or scientific utility; (2) the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Use of Comments

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the submission request toward Office of Management and Budget approval.

Dated: May 2, 2003.

Robert Lewis, Jr.,

Deputy Chief, Research and Development.

BILLING CODE 3410-11-P

BROADCASTING BOARD OF GOVERNORS

Sunshine Act Meeting

DATE AND TIME: May 13, 2003; 3 p.m.-4:15 p.m.

PLACE: Radio Free Asia, 2025 M Street, NW., Suite 300, Washington, DC 20036.

CLOSED MEETING: The members of the Broadcasting Board of Governors (BBG) will meet in closed session to review and discuss a number of issues relating to U.S. Government-funded non-military international broadcasting. They will address internal procedural, budgetary, and personnel issues, as well as sensitive foreign policy issues relating to potential options in the U.S. international field. This meeting is closed because if open it likely would either disclose matters that would be properly classified to be kept secret in the interest of foreign policy under the appropriate executive order (5 U.S.C. 552b.(c)(1)) or would disclose information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action. (5 U.S.C. 552b.(c)(9)(B)) In addition, part of the discussion will relate solely to the internal personnel and organizational issues of the BBG or the International Broadcasting Bureau. (5 U.S.C. 552b.(c)(2) and (6)).

CONTACT PERSON FOR MORE INFORMATION: Persons interested in obtaining more information should contact either Brenda Hardnett or Carol Booker at (202) 401-3736.

Dated: May 5, 2003.

Carol Booker,

Legal Counsel.

DEPARTMENT OF COMMERCE

International Trade Administration

[A-122-845, A-122-847]

Notice of Preliminary Determinations of Sales at Less Than Fair Value: Certain Durum Wheat and Hard Red Spring Wheat From Canada

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of preliminary determinations of sales at less than fair value.

SUMMARY: We preliminarily determine that durum wheat and hard red spring wheat from Canada are being, or are likely to be, sold in the United States at less than fair value, as provided in section 733(b) of the Tariff Act of 1930, as amended.

Interested parties are invited to comment on these preliminary determinations. If these investigations proceed normally, we will make our
