AGENCY: Bureau of Land Management, Interior.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Bureau of Land Management (BLM) requests the Office of Management and Budget (OMB) to extend an existing approval to collect information to ensure operators and mining claimants meet their responsibilities while conducting exploration, mining, and reclamation work on public lands. BLM uses Forms 3809-1, 3809-2, 3809-4, 3809-4a, and 3809-5 to collect financial guarantee bond information for surface management activities. The nonform information under 43 CFR subpart 3809 authorizes operators and mining claimants to perform surface management activities under the General Mining Law.

SUPPLEMENTARY INFORMATION: 5 CFR 1320.12(a) requires that we provide a 60-day notice in the **Federal Register** concerning a collection of information to solicit comments on:

(a) Whether the collection of information is necessary for the proper functioning of the agency, including whether the information will have practical utility;

(b) The accuracy of our estimates of the information collection burden, including the validity of the methodology and assumptions we use;

(c) Ways to enhance the quality, utility, and clarity of the information collected; and

(d) Ways to minimize the information collection burden on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Under the General Mining Law, a citizen may enter onto public domain lands that are subject to the law to prospect and explore for valuable mineral deposits. They may do so without seeking the government's permission beforehand. The rights to a deposit of a valuable mineral are granted through the act of discovering the mineral deposit. After making a discovery, a prospector may choose to locate and record a mining claim to protect investments in exploration and to have a secure tenure to discovered valuable mineral deposits. Locating a mining claim is not a prerequisite for conducting operations on the public lands, nor is it even a requirement for carrying out mining operations. BLM uses the regulations at 43 CFR subpart 3809 to govern hardrock mineral exploration and development on the public lands and Federal interests in the lands. The hardrock minerals are subject to the provisions of the 1872 General Mining Law (30 U.S.C. 22, *et seq.*, as amended).

BLM collects nonform information on surface management activities from mining claimants and operators.
