**Abstract:** The EPA is required under section 183(e) of the Clean Air Act (CAA) to regulate volatile organic compound (VOC) emissions from the use of consumer and commercial products. Pursuant to CAA section 183(e)(3), the EPA published a list of consumer and commercial products and a schedule for their regulation (60 FR 15264). Aerosol coatings are included on the list, and the standards for such coatings are codified at 40 CFR part 59, subpart E. The reports required under the standards enable the EPA to identify coating formulations manufactured, imported or distributed in the United States, and to determine the product-weighted reactivity. The ICR addresses the burden for activities conducted in 3-

year increments after promulgation of the national VOC emission standards for aerosol coatings. Regulated entities read instructions to determine how they are affected by the rule. They are required to submit initial notifications when an aerosol coating is manufactured and notification of changes in the initial report, to report formulation data and exemptions claimed and to maintain records. In addition, regulated entities are required to submit triennial reports that include formulation data and VOC usage.

**Form Numbers:** None.

**Respondents/affected entities:** Manufacturers, distributors and importers of aerosol coatings.

**Respondent's obligation to respond:** Mandatory under 40 CFR part 59, subpart E.

**Estimated number of respondents:** 64 (total).

**Frequency of response:** Annual, triennial.

**Total estimated burden:** 12,265 hours (per year). Burden is defined at 5 CFR 1320.03(b).

**Total estimated cost:** \$1,033,626 (per year), includes no annualized capital or operation & maintenance costs.

**Changes in the estimates:** There is no change in hours in the total estimated respondent burden compared with the ICR currently approved by OMB.
