Abstract: Under the provisions of the Alaska National Interest Lands Conservation Act (ANILCA), qualified rural residents are provided the opportunity to harvest fish, wildlife, and other subsistence resources in national parks, preserves, and monuments in Alaska. The NPS is seeking an extension to continue surveying Alaska residents who customarily and traditionally engage in subsistence activities within NPS units.

The collection includes the following Alaskan National Parks, Preserves, and Monuments: (1) Aniakchak National Monument (ANIA), (2) Bering Land Bridge National Preserve (BELA), (3) Cape Krusenstern National Monument (CAKR), (4) Gates of the Arctic National Park and Preserve (GAAR), (5) Kobuk Valley National Park (KOVA), (6) Noatak National Preserve (NOAT), (7) Wrangell-St. Elias National Park and Preserve (WRST), and (9) Yukon-Charley Rivers National Preserve (YUCH). This survey is conducted through in-person interviews. A facilitator collects information about harvests, uses, and sharing of subsistence resources. Search and harvest areas are also mapped over the course of the interview. The information from this collection will be used by the NPS, the Federal Subsistence Board, the State of Alaska, and local/regional

advisory councils in making recommendations and informing decisions regarding seasons and harvest limits of fish, wildlife, and plants in the region which communities have customarily and traditionally used.

Abstract: The NPS is authorized by the National Park Service Protection Interpretation and research in System (54 U.S.C. 100701) to collect this information. The NPS is requesting approval to use mobile and web-based applications (*e.g.*, iNaturalist, eBird, etc.) to collect natural history observational information from park visitors during citizen science events. The information will be used to substantiate the occurrence of plant, wildlife, and invertebrate species within NPS units during these events. By using citizen science applications, this information will be immediately available to all parks and others interested in species identification and advancing the knowledge of the natural world. Using mobile and web-based applications will enable parks to increase the number of natural history observation records that will contribute to greater understanding of the biodiversity within the park systems.
