AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of final results in the antidumping duty new shipper administrative review of heavy forged hand tools from the People's Republic of China.

SUMMARY: On August 1, 2001, the Department of Commerce (Department)

published the preliminary results of the new shipper review of the antidumping duty order on hammers/sledges, one of the four antidumping duty orders on heavy forged hand tools (HFHTs) from the People's Republic of China (PRC). This review covers one manufacturer/exporter. The period of review (POR) is February 1, 2000 through July 31, 2000.

Based on our analysis of the comments received, we have made changes to the margin calculation. Therefore, the final results differ from the preliminary results. The final weighted-average dumping margin for the reviewed firm is listed below in the section entitled *Final Results of Review*. **EFFECTIVE DATE:** October 29, 2001.

Background

The Department published in the **Federal Register** the antidumping duty orders on HFHTs from the PRC on February 19, 1991. *See Antidumping Duty Orders: Heavy Forged Hand Tools, Finished or Unfinished, With or Without Handles, From the People's Republic of China*, 56 FR 6622 (February 19, 1991). On July 20, 2000, the Department received a request from Shandong Jinma Industrial Group Co., Ltd. (Jinma) for a new shipper review of the antidumping duty order on HFHTs covering hammers/sledges pursuant to section 751(a)(2)(B) of the Act and section 351.214(b) of the Department's

regulations. These provisions state that, if the Department receives from an exporter or producer of the subject merchandise a request for review, which states that it did not export the merchandise to the United States during the period covered by the original less-than-fair-value (LTFV) investigation and that such exporter or producer is not affiliated with any exporter or producer who exported the subject merchandise during that period, then the Department shall conduct a new shipper review to establish an individual weighted-average dumping margin for the requesting exporter or producer, if the Department has not previously established such a margin for the exporter or producer. The regulations require the exporter or producer to include in its request: (1) Documentation establishing the date on which the merchandise was first entered, or withdrawn from the warehouse, for consumption, or, if it cannot establish the date of the first entry, the date on which it first shipped the merchandise for export to the United States, or if the merchandise has not yet been shipped or entered, the date of sale; (2) a list, with appropriate certifications, of the firms with which it is affiliated; (3) a certification from such exporter or producer, and from each affiliated firm, that they did not, under their current or former names, export the merchandise during the LTFV period of investigation (POI), and (4) in an antidumping proceeding involving inputs from a nonmarket economy country, a certification that the export activities of such exporter or producer are not controlled by the central government. *See* 19 CFR 351.214(b)(2)(ii), (iii), and (iv); Statement of Administrative Action (SAA) Accompanying the URAA, H.R. Doc. No. 103–316, vol. 1 (1994) at 875. Jinma's request was accompanied by information and certifications establishing the date on which it first shipped the subject merchandise. Jinma also claimed it had no affiliated companies which exported hammers/sledges from the PRC during the POI. In addition, Jinma certified that its export activities are not controlled by the central government. Based on the above information, the Department initiated a
