II. Discussion

On October 19, 2017, the NRC requested public comment on the draft revision to its guidance document for alternative disposal requests entitled, “Guidance for the Reviews of Proposed Disposal Procedures and Transfers of Radioactive Material Under 10 CFR 20.2002 and 10 CFR 40.13(a).” The purpose of this draft revision to the guidance is to improve the alternative disposal process by providing more clarity, consistency, and transparency to the process. In addition, this draft revision to the guidance also clarifies the meaning of disposal relative to 10 CFR 20.2002 authorizations to include recycling and reuse of materials. The draft revision to the guidance is available for public comment in ADAMS under accession number ML16326A063. The NRC is interested in receiving comments related to the draft revision to the guidance from stakeholders, including professional organizations, licensees, Agreement States, and members of the public. Comments will be considered to determine if additional changes to the draft revision to the guidance and the alternative disposal request process are needed.

The NRC received a request from a public stakeholder to extend the comment period for the draft revision to the alternative disposal requests guidance document in order to allow more time for members of the public to submit their comments. The comment period is being reopened and now closes on January 17, 2018.

Dated at Rockville, Maryland, this 18th day of December 2017.

For the Nuclear Regulatory Commission.
