Title: Servicing of Motor Vehicle Air Conditioners (MVACs).

Abstract: In 1992, EPA developed regulations under section 609 of the Clean Air Act Amendments of 1990 (Act) for the recycling of chlorofluorocarbons and their substitutes in motor vehicle air conditioners (MVACs). These regulations were published in 57 FR 31261 on July 14, 1992, and are codified at 40 CFR part 82, subpart B (§ 82.30 *et seq.*). The information required to be collected under the Section 609 regulations is described below. This information is currently approved for use through September 30, 2005.

The information required to be collected includes the following: submission of a program plan to EPA by organizations who want to participate as an EPA-technician certification program, submission of an application by independent laboratories that proves their general capacity to certify refrigerant recovery and/or recycling equipment to meet the Society of Automotive Engineers (SAE) standards for recycled refrigerant, and for equipment manufacturers or owners wanting to grandfather their equipment, the submission of an application, supporting documents, flow sheets, equipment components and other information which would indicate that the equipment is capable of recycling or recovering the refrigerant to standards set forth in Appendices A, B, C, D, E and F to the regulations.

Motor vehicle air conditioning service establishments are required by Section 609 of the Act to certify that they have purchased refrigerant recycling and/or recovery equipment by January 1, 1992. The Stratospheric Programs Division (SPD) uses the certificates to confirm compliance with Section 609.
