#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The National Medal of Technology and Innovation is the highest honor for technological achievement bestowed by the President of the United States on America's leading innovators. Established by an Act of Congress in 1980, the Medal of Technology was first awarded in 1985. The Medal is awarded annually to individuals, teams (up to four individuals), companies or divisions of companies for their outstanding contributions to the Nation's economic, environmental and social well-being through the development and commercialization of technology products, processes and concepts, technological innovation, and development of the Nation's technological manpower.

The purpose of the National Medal of Technology and Innovation is to recognize those who have made lasting contributions to America's competitiveness, standard of living, and quality of life through technological innovation, and to recognize those who have made substantial contributions to strengthening the Nation's technological workforce. By highlighting the national importance of technological innovation, the Medal also seeks to inspire future generations of Americans to prepare for and pursue technical careers to keep America at the forefront of global technology and economic leadership.

The National Medal of Technology and Innovation Nomination Evaluation Committee, a distinguished independent committee appointed by the Secretary of Commerce, reviews and evaluates the merit of all candidates nominated through an open, competitive solicitation process. The committee makes its recommendations for Medal candidates to the Secretary of Commerce who, in turn, makes recommendations to the President for final selection. The National Medal of Technology and Innovation Laureates

are announced by the White House and the Department of Commerce once the Medalists are notified of their selection.

The public uses the National Medal of Technology and Innovation Nomination Application to recognize through nomination an individual's, team's or company's extraordinary leadership and innovation in technological achievement. The application must be accompanied by six letters of recommendation or support from individuals who have first-hand knowledge of the cited achievement(s).

##### II. Method of Collection

The nomination application and instructions can be downloaded from the USPTO Web site. Nomination files should be submitted by electronic mail to [NMTI@USPTO.gov](mailto:NMTI@USPTO.gov). Alternatively, letters of recommendation may be sent by electronic mail, fax, or overnight delivery.
