#### Approval and Promulgation of Air Quality Implementation Plans; Maryland; Withdrawal of Proposed Rule

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Withdrawal of notice of proposed rulemaking.

**SUMMARY:** On January 26, 1999 (64 FR 3906), EPA proposed to approve the State of Maryland's regulations for Nitrogen Oxides (NO<sub>x</sub>) Budget Program (commonly referred to as the NO<sub>x</sub> Budget Rule) as a revision to the State Implementation Plan (SIP). Prior to our taking any final rulemaking, Maryland informed us that it was revising the rule. On November 18, 1999, Maryland submitted a new SIP revision request to EPA which consists of the revised version of its NO<sub>x</sub> Budget Rule. Because the State of Maryland has now submitted the revised version of its NO<sub>x</sub> Budget Rule as a SIP revision, we are withdrawing our January 26, 1999 proposed rule on the old version. EPA will initiate a new and separate rulemaking on the Maryland's November 18, 1999 SIP revision submittal.

**DATES:** This proposed rule is withdrawn as of June 16, 2000.

#### Project XL Site-Specific Rulemaking for the IBM Semiconductor Manufacturing Facility in Essex Junction, VT

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule; request for comment.

**SUMMARY:** The Environmental Protection Agency (EPA) is today proposing this rule to implement a pilot project under the Project XL program that would provide site-specific regulatory flexibility under the Resource Conservation and Recovery Act (RCRA), as amended, for the International Business Machines Corporation (IBM) semiconductor manufacturing facility in Essex Junction, Vermont. The principal objective of this IBM Vermont XL project is to determine whether the wastewater treatment sludge resulting from an innovative copper metallization process (i.e., an electroplating operation) should be designated a RCRA hazardous waste (F006), and thus be subject to RCRA regulatory controls. If, as a result of this XL project, the Agency determines that the wastewater treatment sludge (which does not otherwise exhibit a hazardous characteristic) need not be subject to RCRA hazardous waste regulations to be protective of human health and the environment and removes such sludges from the hazardous waste program, this would not only enhance the cost-effectiveness of the innovative process by removing the costs of such regulatory controls, but could also encourage the development and installation of this innovative process (or similar ones) by other semiconductor manufacturers. To achieve this, today's proposed rule, when finalized, will provide an exemption of the copper metallization process from the narrative listing description of electroplating operations that result in an F006 wastewater treatment sludge.
