SUPPLEMENTARY INFORMATION:

Purpose of Program: The purpose of the Disability and Rehabilitation Research Projects and Centers Program is to plan and conduct research, demonstration projects, training, and related activities, including international activities, to develop methods, procedures, and rehabilitation technology that maximize the full inclusion and integration into society, employment, independent living, family support, and economic and social self-sufficiency of individuals with disabilities, especially individuals with the most severe disabilities, and to improve the effectiveness of services authorized under the Rehabilitation Act of 1973, as amended (Rehabilitation Act).

Disability and Rehabilitation Research Projects

The purpose of NIDRR's DRPs, which are funded through the Disability and Rehabilitation Research Projects and Centers Program, is to improve the effectiveness of services authorized under the Rehabilitation Act, by developing methods, procedures, and rehabilitation technologies that advance a wide range of independent living and employment outcomes for individuals with disabilities, especially individuals with the most severe disabilities. DRPs carry out one or more of the following types of activities, as specified and defined in 34 CFR 350.13 through 350.19: research, training, demonstration, development, dissemination, utilization, and technical assistance.

An applicant for assistance under this program must demonstrate in its application how it will address, in whole or in part, the needs of individuals with disabilities from minority backgrounds (34 CFR 350.40(a)). The approaches an applicant may take to meet this requirement are found in 34 CFR 350.40(b).

Additional information on the DRRP program can be found at: [http://](http://www2.ed.gov/rschstat/research/pubs/res-program.html#DRRP)

www2.ed.gov/rschstat/research/pubs/res-program.html#DRRP.

Program Authority: 29 U.S.C. 762(g) and 764(a).

Applicable Program Regulations: 34 CFR part 350.

We published a notice of proposed priority for this program in the **Federal Register** on January 15, 2013 (78 FR 2919). That notice contained background information and our reasons for proposing the particular priority.

There are differences between the notice of proposed priority and this notice of final priority as discussed in the *Analysis of Comments and Changes* section in this notice. In addition, we inadvertently stated in the Summary section of the notice of proposed priority, that we intend this priority to contribute to improved employment outcomes for individuals with disabilities. NIDRR did not intend to convey that this priority is focused exclusively on employment outcomes for individuals with disabilities. We have corrected the summary statement in this notice.

Public Comment: In response to our invitation in the notice of proposed priority, four parties submitted comments.

Generally, we do not address technical and other minor changes, or suggested changes the law does not authorize us to make under the applicable statutory authority. In addition, we do not address general comments that raised concerns not directly related to the proposed priority.

Analysis of Comments and Changes: An analysis of the comments and of any changes in the priority since publication of the notice of proposed priority follows.

Comment: One commenter suggested the priority address natural language processing and ways to determine how to make Web content and interactions easier to understand for individuals with mental disabilities. Specifically, the commenter suggested research on: ways to assess perceptions of individuals with mental disabilities, the effects of technology across multiple life contexts, and understandable cloud and Web computing languages.

Discussion: Determining how to make Web content and interactions easier to understand for individuals with mental disabilities is consistent with the proposed priority, which requires the DRRP to contribute to the development of an inclusive cloud and Web infrastructure that incorporates options for disability access within its general structure. Nothing in the priority would preclude an applicant from proposing research in this area. However, NIDRR
