[Project No. 2275-050]

Public Service Company of Colorado; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission or FERC) regulations, 18 CFR part 380, Commission staff reviewed the Public Service Company of Colorado's application for an amendment to the license of the Salida Hydroelectric Project No. 2275 and have prepared an Environmental Assessment (EA) for the proposed amendment. The Salida Project consists of two developments, Salida No. 1 and Salida No. 2. The licensee has determined that the Salida No. 1 development is no longer economical. The licensee proposes to amend the existing license for the project to decommission the Salida No. 1 development by removing the Garfield and Fooses dams and reservoirs, pipeline, penstock, powerhouse, and substation. The Salida Project is located on the South Arkansas River and Fooses Creek, approximately 6 miles west of the town of Poncha Springs in Chaffee County, Colorado. The project partially occupies federal land managed by the U.S. Forest Service within the Pike-San Isabel National Forests.

The EA contains Commission staff's analysis of the potential environmental effects of the proposed amendment to the license, and concludes that the proposed amendment, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The EA may be viewed on the Commission's website at <http://www.ferc.gov> using the "elibrary" link. Enter the docket number (P-2275) in the docket number field to access the document.
