

Notices

Federal Register

Vol. 73, No. 186

Wednesday, September 24, 2008

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

JOINT BOARD FOR THE ENROLLMENT OF ACTUARIES

Meeting of the Advisory Committee; Meeting

AGENCY: Joint Board for the Enrollment of Actuaries.

ACTION: Notice of Federal Advisory Committee meeting.

SUMMARY: The Executive Director of the Joint Board for the Enrollment of Actuaries gives notice of a closed meeting of the Advisory Committee on Actuarial Examinations.

DATES: The meeting will be held on October 27, 2008, from 8:30 a.m. to 5 p.m.

ADDRESSES: The meeting will be held at Mercer, 1717 Arch Street, 27th Floor, Philadelphia, PA.

FOR FURTHER INFORMATION CONTACT: Patrick W. McDonough, Executive Director of the Joint Board for the Enrollment of Actuaries, 202-622-8225.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Advisory Committee on Actuarial Examinations will meet at Mercer, 1717 Arch Street, 27th Floor, Philadelphia, PA on Friday, October 27, 2008, from 8:30 a.m. to 5 p.m.

The purpose of the meeting is to discuss questions that may be recommended for inclusion on future Joint Board examinations in actuarial mathematics, pension law and methodology referred to in 29 U.S.C. 1242(a)(1)(B).

A determination has been made as required by section 10(d) of the Federal Advisory Committee Act, 5 U.S.C. App., that the subject of the meeting falls within the exception to the open meeting requirement set forth in Title 5 U.S.C. 552b(c)(9)(B), and that the public interest requires that such meeting be closed to public participation.

Dated: September 16, 2008.

Patrick W. McDonough,
Executive Director, Joint Board for the Enrollment of Actuaries.

Forest Service

Chequamegon-Nicolet National Forest; Wisconsin, Grub Hoe Vegetation and Transportation Management Project

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Eagle River-Florence Ranger District intends to prepare an environmental impact statement (EIS) to disclose the environmental consequences of proposed vegetation and transportation management activities. The Grub Hoe Vegetation and Transportation Management Project (Grub Hoe Project) area is approximately 11,640 acres in size; about 8,500 acres of this is National Forest System land. The project area is located in Florence County, 15 miles southwest of Florence, Wisconsin. The legal description is T39N, R15E, Sections 1, 2, 8-17, 22-24; T39N, R16E, Sections 5-7, 18, 19. See the **SUPPLEMENTARY INFORMATION** section for the purpose and need for the action.

DATES: Comments concerning the scope of the analysis should be received by October 24, 2008, to receive timely consideration. The draft environmental impact statement is expected January 2009, and the final environmental impact statement is expected March 2009.

ADDRESSES: Send written comments to District Ranger Joel Skerven, Eagle River-Florence Ranger District, Chequamegon-Nicolet National Forest, 1247 East Wall Street, Eagle River, WI 54521. For further information, mail correspondence to Christine Brunner, NEPA Coordinator, Eagle River-Florence Ranger District, 1247 East Wall Street, Eagle River, WI 54521.

SUPPLEMENTARY INFORMATION:

Purpose and Need for Action

The overall purpose of the Grub Hoe Project is to implement land management activities consistent with

the direction in the 2004 Chequamegon-Nicolet National Forest Land and Resource Management Plan (Forest Plan). One purpose for this proposal is to maintain or restore upland forest communities and opening to their desired conditions as described in Chapter 3 of the Forest Plan; a second purpose is to provide an efficient road system. Based on the Forest Plan desired future conditions for the area, the following nine needs were identified: (1) Increase the diversity of northern hardwood forest structure and composition; (2) reduce fragmentation in larger patches of northern hardwood forest; improve aquatic ecosystems; (4) improve upland forest type composition; (5) improve the aspen age class distribution; (6) promote healthy forests; (7) improve habitat for early-successional forest dependent wildlife species; (8) contribute toward satisfying the demand for wood products; (9) provide a safe, efficient, and effective transportation system.

Proposed Action

In order to address the needs identified above, approximately 3326 acres of various forest types would be harvested using selection, removal, shelterwood, patch clearcut, clearcut, and thin harvest methods. As a result of clearcutting three contiguous aspen stands, this alternative would result in a temporary opening of approximately 73 acres. This deviates from a Forest Plan guideline to limit temporary openings to 40 acres.

The second purpose for this proposal is to provide an efficient road system that meets the long-term transportation needs of the Forest. In order to address need 9 above, approximately 20.8 miles of unclassified roads would be decommissioned; 3.9 miles would be reconstructed and classified; and 1.4 miles of new road would be constructed but closed after project activities are completed.

Possible Alternatives

Two alternatives to the Proposed Action have been developed in response to public comments received. One alternative would result in the following changes to the Proposed Action: Eliminate aspen conversions to other forest types in all but three stands, clearcutting and regenerating them to aspen instead; clearcut and regenerate the two stands identified for patch

clearcutting under the Proposed Action; clearcut and regenerate an additional three aspen stands. This alternative would also result in a temporary opening of approximately 73 acres.

Under a second alternative the following activities would be deferred: harvesting stands of aspen forest type; potential salvage harvesting; harvesting within 124 acres of historic or current goshawk or red-shouldered hawk nest sites (the Forest Plan requires at minimum a 30-acre nest buffer); road construction and reconstruction.

Responsible Official

The responsible official for this project is Joel Skjerven, Eagle River-Florence District Ranger, 1247 E. Wall Street, Eagle River, WI 54521.

Nature of Decision To Be Made

The decision will be limited to answering the following questions based on the environmental analysis: (1) What actions would be used to address the purpose and need; (2) where and when will these actions occur; and (3) what mitigation measures and monitoring requirements would be required.

Scoping Process

The Chequamegon-Nicolet Forest began the scoping process for this project as an environmental assessment during May 2008. Persons and organizations on the District's mailing list were sent information packages, and a notice was placed in the newspaper of record. The project is listed in the Chequamegon-Nicolet Schedule of Proposed Actions, and is viewable on the Forest Web page at <http://www.fs.fed.us/r9/cnnf/>. Click on "Project Proposals and Decisions," then "Grub Hoe Vegetation and Transportation Management Project."

Preliminary Issues

The following issues will be analyzed in the EIS: Effects of the proposed activities on soils, water, Regional Forester Sensitive Species plants and wildlife, and non-native invasive species.

Comment Requested

This notice of intent initiates the scoping process which guides the development of the environmental impact statement.

Early Notice of Importance of Public Participation in Subsequent Environmental Review: A draft environmental impact statement will be prepared for comment. The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection

Agency publishes the notice of availability in the **Federal Register**.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Comments received, including the names and addresses of those who comment, will be considered part of the public record on this proposal and will be available for public inspection.

Authority: 40 CFR 1501.7 and 1508.22; Forest Service Handbook 1909.15, Section 21.

Dated: September 15, 2008.

Jeanne M. Higgins,
Forest Supervisor.

Notice of Final Flat Fee Policy for Outfitting and Guiding Land Use Fees in the Alaska Region

AGENCY: Forest Service, USDA.

ACTION: Notice of final policy.

SUMMARY: The Alaska Region of the Forest Service is publishing a final regional flat fee policy. The initial proposal was published in the **Federal Register** on September 15, 2006 (71 FR 54454). The revised policy published April 18, 2008 (73 FR 21098) differed enough from the initial proposed policy to merit public notice and comment.

FOR FURTHER INFORMATION CONTACT: Trish Clabaugh, (907) 586-8855.

SUPPLEMENTARY INFORMATION:

Background

In *The Tongass Conservancy v. Glickman*, No. J97-029-CV, slip op. (D. Alaska Sept. 19, 1998), the court held that the Forest Service's land use fee system must be fair to the plaintiff outfitter and guide, as well as based on the market value of the use of National Forest System (NFS) lands. In addition, based on a concern that different fees were being charged for the same type of commercial use of NFS lands, the court held that there was "insufficient evidence in the record to support a conclusion that the fees charged plaintiff were both fair and based upon the value of the use of Forest Service lands available to the plaintiff." *The Tongass Conservancy*, slip op. at 2. The court ordered the Alaska Region of the Forest Service to undertake actions consistent with the court's ruling and applicable law.

In response, on July 21, 1999, the Alaska Region published in the **Federal Register** for public notice and comment a proposed interim flat fee policy for all outfitting and guiding in the Alaska Region (Alaska Region Interim Flat Fee Policy or ARIFFP) (64 FR 39114, July 21, 1999). The notice for the final interim ARIFFP was published in the **Federal Register** and went into effect on February 14, 2000 (65 FR 1846, January 12, 2000).

In August 2003, the Anchorage-based appraisal firm Black-Smith and Richards, Inc. (BSR) completed its phase II market study (Final Phase II Report) on development of a land use fee system for outfitting and guiding in the Alaska Region that is both fair to the outfitters and guides, and based on market value of the use of NFS lands for outfitting and guiding. The Final Phase II Report
