SUPPLEMENTARY INFORMATION:**I. Abstract**

The "Survey of International Air Travelers" (Survey) program, administered by the National Travel and Tourism Office (NTTO) of the International Trade Administration provides source data required to (1) estimate international travel and passenger fare exports, imports and the trade balance for the United States, (2) comply with the U.S. Travel Promotion Act of 2009 (Pub. L. 111-145), collect a one percent sample of inbound travelers, analyze and report information to the Corporation for Travel Promotion (CTP), d/b/a Brand USA, and support the National Export Initiative (NEI) to double exports for the country, (3) to comply with the 1961, 1981, and 1996 travel and tourism related acts to collect and publish comprehensive international travel and tourism, statistics and other marketing information, and (4) support the

continuation of the Travel & Tourism Satellite Accounts for the United States, which provide the only spending and employment figures for the industry, and (5) to support the goals of objectives of the President's National Travel & Tourism Strategy.

The Survey program contains the core data that is collected, analyzed and communicated by NTTO with other government agencies, associations and businesses that share the same objective of increasing U.S. international travel exports. The Survey assists NTTO in assessing the economic impact of international travel on state and local economies, providing visitation estimates, key market intelligence, and identifying traveler and trip characteristics. The U.S. Department of Commerce assists travel industry enterprises to increase international travel and passenger fare exports for the country as well as outbound travel on U.S. carriers. The Survey program provides the only available estimates of nonresident visitation to the states and cities within the United States, as well as U.S. resident travel abroad.

A new survey instrument (questionnaire) (English version plus its translations into eleven foreign languages) was implemented in 2012. It reflects input from over 70 respondents, including: Travel Industry (airlines, travel associations, destinations, lodging); Consultants; Financial Firms; Educational Institutions; and other U.S. Government Agencies.

The new Survey questionnaire reflects changes in various questions relating to: Trip purpose; Payment methods; Booking/Information sources; additional package components, health care/vaccinations, travel insurance information, additional transportation utilized, Assessment of the Visitor's Experience; and intentions for further travel to the United States; Ethnicity/race. Several questions from the pre-existing 1996 questionnaire were eliminated to further streamline the survey.

II. Method of Collection

The survey instrument/questionnaire ("Survey of International Air Travelers") continues to be in paper format and is self-administered by the passenger who volunteers to take the survey, either while in the departure gate area or on-board the flight. The flights are selected randomly and this approach is described as 'cluster sampling.' The majority (80%) of the passenger surveys are collected in U.S. airport departure gate areas. About 20% of all the passenger surveys are collected during flight (on-board) post

departure (Canada is not part of the program). U.S. and foreign flag airlines that volunteer to participate in the Survey program enable the collection either in U.S. departure gate areas or on-board flights.

NTTO is planning to change the format to electronic or to a more efficient and equally statistically valid process once compelling results have been attained. To date there have been 'e-Survey tests' in partnership with Global Distribution Systems (GDS) and with a major airline in its boarding area. Other tests are planned this year including the goal to leverage personal electronic devices (PED) and Wi-Fi capabilities in the airport and on-board certain flights.
