**Pfizer, Inc., Pilot Plant, Kalamazoo, MI;
Notice of Termination of Investigation**

Pursuant to section 221 of the Trade Act of 1974, as amended, an investigation was initiated on August 29, 2007 in response to a worker petition filed by a state workforce representative on behalf of workers of Pfizer, Inc, Pilot Plant, Kalamazoo, Michigan.

The petitioning group of workers is covered by an active certification (TA-W-59,828) which expires on October 8, 2008. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, DC, this 9th day of November, 2007.

SUPPLEMENTARY INFORMATION:**I. Background**

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

Paragraphs (b)(1), (b)(2), (c)(1), (c)(2), and (c)(4) contain the paperwork requirements of the Standard.

Under paragraph (b)(1) of the Standard, employers must develop and maintain an organizational statement that establishes the: Existence of a fire brigade; the basic organizational structure of the brigade; type, amount, and frequency of training provided to brigade members; expected number of

members in the brigade; and functions that the brigade is to perform. This paragraph also specifies that the organizational statement must be available for review by employees, their designated representatives, and OSHA compliance officers. The organizational statement delineates the functions performed by the brigade members and, therefore, determines the level of training and type of personal protective equipment (PPE) necessary for these members to perform their assigned functions safely. Making the statement available to employees, their designated representatives, and OSHA compliance officers ensures that the elements of the statement are consistent with the functions performed by the brigade members and the occupational hazards they experience, and that employers are providing training and PPE appropriate to these functions and hazards.

To permit an employee with known heart disease, epilepsy, or emphysema to participate in fire-brigade emergency activities, paragraph (b)(2) of the Standard requires employers to obtain a physician's certificate of the employee's fitness to do so. This provision provides employers with a direct and efficient means of ascertaining whether or not they can safely expose employees with these medical conditions to the hazards of fire-fighting operations.

Paragraph (c)(1) of the Standard requires employers to provide training and education for fire-brigade members commensurate with the duties and functions they perform, with brigade leaders and training instructors receiving more comprehensive training and education than employers provide to the general membership. Under paragraph (c)(2) of the Standard, employers must conduct training and education frequently enough, but at least annually, to assure that brigade members are able to perform their assigned duties and functions satisfactorily and safely; employers must provide brigade members who perform interior structural fire fighting with educational and training sessions at least quarterly. In addition, paragraph (c)(4) specifies that employers must: Inform brigade members about special hazards such as storage and use of flammable liquids and gases, toxic chemicals, radioactive sources, and water-reactive substances that may be present during fires and other emergencies; advise brigade members of changes in the special hazards; and develop written procedures that describe the actions brigade members must take when special hazards are present, and make these procedures available in the education and training

program and for review by the brigade members.

Providing appropriate training to brigade members at the specified frequencies, informing them about special hazards, developing written procedures on how to respond to special hazards, and making these procedures available for training purposes and review by the members enables them to use operational procedures and equipment in a safe manner to avoid or control dangerous exposures to fire related hazards. Therefore, the training and information requirements specified by paragraphs (c)(1), (c)(2), and (c)(4) of the Standard prevent serious injuries and death among members of fire brigades.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Standard on Fire Brigades (29 CFR 1910.156). The Agency is requesting an adjustment decrease from 6,042 hours to 5,048 hours for a total decrease of 994 hours. The decrease is a result of updated data estimating that the total number of establishments requiring new or revised organizational statements has declined from 2,797 to 2,337; and that the number of fire brigade members has declined from 559,390 to 467,330. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Standard on Fire Brigades (29 CFR 1910.156).

OMB Number: 1218-0075.

Affected Public: Business or other for-profit.

Number of Respondents: 7,010.

Frequency: On occasion.

Average Time Per Response: Varies from 5 minutes (.05 hour) to obtain a physician's certificate to 2 hours to develop or revise an organizational plan.

Estimated Total Burden Hours: 5,048.

Estimated Cost (Operation and Maintenance): \$0.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows:

(1) Electronically at <http://www.regulations.gov>, which is the Federal eRulemaking Portal; (2) by facsimile (FAX); or (3) by hard copy. All comments, attachments, and other material must identify the Agency name and the OSHA docket number for the ICR (Docket No. OSHA-2007-0079). You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled **ADDRESSES**). The additional materials must clearly identify your electronic comments by your name, date, and the docket number so the Agency can attach them to your comments.

Because of security procedures, the use of regular mail may cause a significant delay in the receipt of comments. For information about security procedures concerning the delivery of materials by hand, express delivery, messenger, or courier service, please contact the OSHA Docket Office at (202) 693-2350 (TTY (877) 889-5627).

Comments and submissions are posted without change at <http://www.regulations.gov>. Therefore, OSHA cautions commenters about submitting personal information such as social security numbers and date of birth. Although all submissions are listed in the <http://www.regulations.gov> index, some information (e.g., copyrighted material) is not publicly available to read or download through this Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the <http://www.regulations.gov> Web site to submit comments and access the docket is available at the Web site's "User Tips" link. Contact the OSHA Docket Office for information about materials not available through the Web site, and for assistance in using the Internet to locate docket submissions.

NUCLEAR REGULATORY COMMISSION**Notice of Availability on Model Safety Evaluation; Model No Significant Hazards Determination, and Model Application for Licensees That Wish to Adopt TSTF-478, Revision 2, "BWR Technical Specification Changes that Implement the Revised Rule for Combustible Gas Control"**

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of Availability.

SUMMARY: Notice is hereby given that the staff of the Nuclear Regulatory Commission (NRC) has prepared a model safety evaluation (SE) and a model application related to the modification of containment combustible gas control requirements in technical specifications (TS) for Boiling Water Reactors (BWR). The NRC staff has also prepared a model no-significant-hazards-consideration (NSHC) determination related to this matter. The purpose of these models is to permit the NRC to efficiently process license amendment applications that propose to adopt TSTF-478, Revision 2, "BWR Technical Specification Changes that Implement the Revised Rule for Combustible Gas Control." TSTF-478, Revision 2, deletes Standard Technical Specification (STS) 3.6.3.3, "Containment Atmosphere Dilution (CAD) System" and modifies STS 3.6.3.1, "Drywell Cooling System Fans," in NUREG-1433, "Standard Technical
