

sufficiently to meet the applicable NRTL requirements.

OSHA staff also performed an audit of the TUVRNA Austin site on August 23–25, 2010. The auditors found some non-conformances with the requirements of 29 CFR 1910.7. TUVRNA addressed these issues sufficiently to meet the applicable NRTL requirements. This preliminary finding does not constitute an interim or temporary approval of the application for renewal.

OSHA welcomes public comment as to whether TUVRNA meets the requirements of 29 CFR 1910.7 for renewal of their recognition as an NRTL. Comments should consist of pertinent written documents and exhibits. Commenters needing more time to comment must submit a request in writing, stating the reasons for the request. OSHA must receive the written request for an extension by the due date for comments. OSHA will limit any extension to 30 days unless the requester justifies a longer period. OSHA may deny a request for an extension if it is not adequately justified. To obtain or review copies of the publicly available information in TUVRNA's application and other pertinent documents (including exhibits), as well as all submitted comments, contact the Docket Office, Room N–2625, Occupational Safety and Health Administration, U.S. Department of Labor, at the above address; these materials also are available online at <http://www.regulations.gov> under Docket No. OSHA–2007–0042.

OSHA staff will review all comments to the docket submitted in a timely manner and, after addressing the issues raised by these comments, will recommend whether to grant TUVRNA's application for renewal. The Assistant Secretary will make the final decision on granting the application and, in making this decision, may undertake other proceedings prescribed in Appendix A to 29 CFR 1910.7. OSHA will publish a public notice of this final decision in the **Federal Register**.

II. Discussion

The NRC is issuing for public comment a draft plant-specific Supplement 51 to the GEIS for License Renewal of Nuclear Plants, NUREG-1437, regarding the renewal of operating license NPF-30 for an additional 20 years of operation for Callaway. Supplement 51 to the GEIS includes the preliminary analysis that evaluates the environmental impacts of the proposed action and alternatives to the proposed action. The NRC's preliminary recommendation is that the adverse environmental impacts of license renewal for Callaway are not great enough to deny the option of license renewal for energy planning decision makers.

III. Public Meetings

The NRC staff will hold public meetings prior to the close of the public comment period to present an overview of the draft plant-specific supplement to the GEIS and to accept public comment on the document. Two meetings will be held at the Fulton City Hall, 18 East 4th Street, Fulton, Missouri 65251 on Wednesday, March 19, 2014. The first session will convene at 2:00 p.m. and will continue until 3:30 p.m., as necessary. The second session will convene at 7:00 p.m. and will continue until 8:30 p.m., as necessary.
