

3. Screening, Brief Intervention, Treatment and Referral (SBIRT) grant program:
 - 150,618 Screening Only (SO) respondents complete section A of the GPRA instrument, all of these items are asked during a customary and usual intake process resulting in zero burden; and
 - 27,679 Brief Intervention (BI) respondents complete sections A & B of the GPRA instrument, all of these items are asked during a customary and usual intake process resulting in zero burden; and
 - 9,200 Brief Treatment (BT) & Referral to Treatment (RT) respondents complete all sections of the GPRA instrument.
4. Data Extract by Grants: Grant burden for capturing customary and usual data.
5. Upload: 5 of the 7 SBIRT grants upload data; the other 2 grants conduct direct data entry.
6. Estimate based on \$5.15 for program staff and \$15 for IT staff.

Written comments and recommendations concerning the proposed information collection should be sent by February 5, 2007 to: SAMHSA Desk Officer, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503; due to potential delays in OMB's receipt and processing of mail sent through the U.S. Postal Service, respondents are encouraged to submit comments by fax to: 202-395-6974.

Dated: December 22, 2006.

Elaine Parry,

Acting Director, Office of Program Services.

BILLING CODE 4162-20-P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

DEPARTMENT OF TRANSPORTATION [USCG-2006-24685]

Long Range Aids to Navigation (LORAN) Program; Office of Navigation and Spectrum Management

AGENCY: Coast Guard, DHS, Office of the Secretary, DOT.

ACTION: Notice; request for public comments.

SUMMARY: The Department of Transportation in coordination with the Department of Homeland Security is considering the need to continue to operate or invest in the North American LORAN-C Radionavigation System beyond fiscal year 2007. Future investment decisions might include: Decommissioning the LORAN-C system, maintaining the LORAN-C system as currently configured, or developing a fully deployed Enhanced LORAN (eLORAN) system. Contributing factors to these decisions are (1) whether the Global Positioning System (GPS) and other available back-up systems are adequate for the public's navigation and timing needs, thus making the LORAN-C system redundant, and (2) whether the eLORAN investments made to date

provide enhancements that now merit consideration as a complementary capability to GPS, and not merely as a GPS back-up. The Department of Transportation and the Department of Homeland Security seek public input on the various decisions currently under consideration. For more information on LORAN, you may visit <http://www.navcen.uscg.gov>.

DATES: Comments and related material must reach the Docket Management Facility on or before February 7, 2007.

ADDRESSES: You may submit comments identified by Coast Guard docket number USCG-2006-24685 to the Docket Management Facility at the U.S. Department of Transportation. To avoid duplication, please use only one of the following methods:

(1) *Web Site:* <http://dms.dot.gov>.

(2) *Mail:* Docket Management Facility, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590-0001.

(3) *Fax:* 202-493-2251.

(4) *Delivery:* Room PL-401 on the Plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is 202-366-9329.

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice, call Mr. Greg Wheeler, Department of Transportation, Office of Navigation and Spectrum Policy, 202-366-4894, e-mail Greg.Wheeler@dot.gov or LT Michael Herring, Project Officer, Office of Navigation Systems, Coast Guard, telephone 202-372-1561, e-mail Michael.L.Herring@uscg.mil. If you have questions on viewing or submitting material to the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202-493-0402.

You may obtain a copy of this notice by calling the U.S. Coast Guard Infoline at 1-800-368-5647 or read it on the Internet on the Coast Guard Navigation Center Web site at <http://www.navcen.uscg.gov> or at <http://dms.dot.gov>.

SUPPLEMENTARY INFORMATION:

Request for Comments

All comments received will be posted, without change, to <http://dms.dot.gov>

and will include any personal information you have provided. Please see DOT's "Privacy Act" paragraph below.

Submitting comments: If you submit a comment, please include your name and address, identify the docket number for this notice (USCG-2006-24685) and give the reason for each comment. You may submit your comments by electronic means, mail, fax, or delivery to the Docket Management Facility at the address under **ADDRESSES**; but please submit your comments by only one means. If you submit them by mail or delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit them by mail and would like to know that they reached the Facility, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments received during the comment period.

Viewing comments and documents: To view comments, go to <http://dms.dot.gov> at any time, click on "Simple Search," enter the last five digits of the docket number for this notice, and click on "Search." You may also visit the Docket Management Facility in room PL-401 on the Plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Privacy Act: Anyone can search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review the Department of Transportation's Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477), or you may visit <http://dms.dot.gov>.

Background and Purpose

The North American LORAN-C system is a low frequency hyperbolic radionavigation system. It is approved for use in the U.S. Coastal Confluence Zone (CCZ) and as a supplemental air navigation aid. More information about LORAN-C is available at: <http://www.navcen.uscg.gov/loran/default.htm>.

While the current LORAN-C system is based on technology developed in the 1960's, a portion of the stations have been updated to allow for an enhanced signal (Enhanced LORAN) once the entire system is upgraded. More information about Enhanced LORAN (eLORAN) is available at: <http://www.navcen.uscg.gov/loran/9th-pulse-modulation-ldc.html>. Although eLORAN would improve both the accuracy and reliability of LORAN transmissions, and provide a precise timing service, further capital investment would be required before such a system would be fully operational.

The Department of Transportation and the Department of Homeland Security are evaluating: (1) Decommissioning the LORAN system, (2) maintaining the system as currently configured, and (3) whether further investment in modernizing and improving LORAN is in the public interest.

Next Steps for this Project

At this time, the Department of Transportation and the Department of Homeland Security seek public input on the various decisions currently under consideration, namely (1) the extent to which the current LORAN-C in its current form is used for positioning, navigation and timing, and (2) the extent to which eLORAN would be applied to these same practices as either a complementary service or as a backup to GPS. After considering all comments, the Department of Transportation and the Department of Homeland Security will inform the public of the agreed course of action with respect to future investment in LORAN.

Dated: December 22, 2006.

Robert Zitz,

*Deputy Under Secretary for Preparedness,
Department of Homeland Security.*

Jeffrey N. Shane,

*Under Secretary for Policy, Department of
Transportation.*

BILLING CODE 4910-15-P

INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO, AND UNITED STATES SECTION

Notice of Availability of a Draft Environmental Assessment and Finding of No Significant Impact for Improvements to the Lateral A/Retamal Dike Levee System, in the Lower Rio Grande Flood Control Project, located in Hidalgo County, TX

AGENCY: United States Section, International Boundary and Water Commission, United States and Mexico.

ACTION: Notice of Availability of Draft Environmental Assessment (EA) and Draft Finding of No Significant Impact (FONSI).

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969, the Council on Environmental Quality Final Regulations (40 CFR Parts 1500 through 1508), and the United States Section, International Boundary and Water Commission's (USIBWC) Operational Procedures for Implementing Section 102 of NEPA, published in the **Federal Register** September 2, 1981, (46 FR 44083); the USIBWC hereby gives notice that the Draft Environmental Assessment and FONSI for Improvements to the Lateral A/Retamal Dike Levee System, in the Lower Rio Grande Flood Control Project, located in Hidalgo County, Texas, are available.

FOR FURTHER INFORMATION CONTACT: Daniel Borunda, Environmental Protection Specialist, Environmental Management Division, United States Section, International Boundary and Water Commission; 4171 N. Mesa, C-100; El Paso, Texas 79902. Telephone: (915) 832-4767; e-mail: daniel.borunda@ibwc.state.gov.

DATES: Comments on the Draft EA and Draft FONSI will be accepted through February 5, 2007.

SUPPLEMENTARY INFORMATION:

Background

The USIBWC is authorized to construct, operate, and maintain any project or works projected by the United States of America on the Lower Rio Grande Flood Control Project (LRGFCP), as authorized by the Act of the 74th Congress, Sess. I Ch. 561 (H.R. 6453), approved August 19, 1935 (49 Stat. 660), and codified at 22 U.S.C. Section 277, 277a, 277b, 277c, and Acts amendatory thereof and supplementary thereto. The LRGFCP was constructed to protect urban, suburban, and highly developed irrigated farmland along the Rio Grande delta in the United States and Mexico.

The USIBWC, in cooperation with the U.S. Fish and Wildlife Service (USFWS), prepared this Draft Environmental Assessment (Draft EA) for the proposed action of raising the Lateral A/Retamal Dike Levee System located in Hidalgo County, Texas to improve flood control. This levee system is part of the LRGFCP that extends approximately 180 miles from the Town of Peñitas in south Texas to the Gulf of Mexico. The Lateral A/Retamal Dike Levee System extends approximately 14 miles, from the Carlson Settling Basin to Retamal Diversion Dam.

Proposed Action

The Proposed Action would increase the flood containment capacity of the Lateral A/Retamal Dike System to meet the 3-foot freeboard design criterion for flood protection. Throughout the approximately 11.5-mile Lateral A segment, height increases between 1.5 and 4 feet are typically needed to reach the design freeboard value. For the 3.5-mile Retamal Dike segment, typical increases in levee height range from 0 to 2 feet. The increase in levee height will result in an expansion to the levee footprint by lateral extension of the structure. Structural improvements, such as a slurry cutoff barrier or a riverside impermeable liner, may be required for some levee segments where seepage is a potential problem.

Alternatives to the Proposed Action

A No Action Alternative was evaluated for the Lateral A/Retamal Dike System. This alternative will retain the existing configuration of the system, as designed over 30 years ago, and the current level of protection currently associated with this system. Under severe storm events, current containment capacity may be insufficient to fully control Rio Grande flooding, with risks to personal safety and potential property damage.

Summary of Findings

Pursuant to NEPA guidance (40 Code of Federal Regulations 1500-1508), The President's Council on Environmental Quality issued regulations for NEPA implementation which included provisions for both the content and procedural aspects of the required Environmental Assessment. The USIBWC completed an EA of the potential environmental consequences of raising the Lateral A/Retamal Dike System to meet current requirements for flood control. The EA, which supports this Finding of No Significant Impact, evaluated the Proposed Action and No Action Alternative.
