

**DEPARTMENT OF ENERGY****Federal Energy Regulatory Commission****[Docket No. CP24-479-001]****National Fuel Gas Supply Corporation;  
Notice of Request for Extension of  
Time**

Take notice that on July 28, 2025, National Fuel Gas Supply Corporation (National Fuel) requested that the Commission grant an extension of time, until August 24, 2026, to complete construction and place into service the Zoar Storage Field Project (Project) located in Erie County, New York. On June 25, 2024, the Commission issued a Notice of Request Under Blanket Authorization, which established a 60-day comment period, ending on August 26, 2024, to file protests. No protests were filed during the comment period, and accordingly the project self-implemented on August 27, 2024 and by Rule should have been completed within one year.

As of May 2025, National fuel has commenced and completed abandonment operations on wells 0050-I and 0886-I. During the rig move, a small annular vent was discovered at both wells using a methane detection device. National Fuel states the detected vents have been verified by the New York State Department of Conservation. Currently, National Fuel is in the process of abandoning well 0694-I and working through a diagnostic and remediation plan for wells 0050-I and 0886-I. National Fuel will complete these projects prior to mobilizing to well 0893-I to commence abandonment operations. National Fuel requests an extension of time to remediate the annular vents, finalize abandonment, and complete final restoration of the well sites.

This notice establishes a 15-calendar day intervention and comment period deadline. Any person wishing to comment on National Fuel's request for an extension of time may do so. No reply comments or answers will be considered. If you wish to obtain legal status by becoming a party to the proceedings for this request, you should, on or before the comment date stated below, file a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (NGA) (18 CFR 157.10).

As a matter of practice, the Commission itself generally acts on requests for extensions of time to complete construction for NGA facilities

when such requests are contested before order issuance. For those extension requests that are contested,<sup>1</sup> the Commission will aim to issue an order acting on the request within 45 days.<sup>2</sup> The Commission will address all arguments relating to whether the applicant has demonstrated there is good cause to grant the extension.<sup>3</sup> The Commission will not consider arguments that re-litigate the issuance of the certificate order, including whether the Commission properly found the project to be in the public convenience and necessity and whether the Commission's environmental analysis for the certificate complied with the National Environmental Policy Act (NEPA).<sup>4</sup> At the time a pipeline requests an extension of time, orders on certificates of public convenience and necessity are final and the Commission will not re-litigate their issuance.<sup>5</sup> The Director of the Office of Energy Projects, or his or her designee, will act on all of those extension requests that are uncontested.

**ENVIRONMENTAL PROTECTION  
AGENCY****[EPA-HQ-OPP-2024-0093; FRL-12542-01-  
OCSPP]****Notice of Receipt of Requests To  
Voluntarily Cancel Certain Pesticide  
Registrations and/or Amend  
Registrations To Terminate Certain  
Uses (December 2024)**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** This document announces the Agency's receipt of and solicits comment on requests by registrants to voluntarily cancel their pesticide registration of certain products and/or to amend their product registrations to terminate one or more uses. In accordance with the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA provides a periodic notice of receipt addressing requests received by EPA since the last notice of receipt was issued and uses the month and year in the title to help distinguish one

document from the other. EPA intends to grant these requests at the close of the comment period for this announcement unless the Agency receives substantive comments during the comment period that would merit further review of the requests, or the request is withdrawn by the registrant. If these requests are granted, EPA will issue an order in the **Federal Register** cancelling the listed product registrations, after which any sale, distribution, or use of the products listed in this document will only be permitted after the registrations have been cancelled if such sale, distribution, or use is consistent with the terms as described in the final order.

**DATES:** Comments and withdrawal requests must be received on or before September 10, 2025.

**ADDRESSES:** Submit your comments, identified by docket identification (ID) number EPA–HQ–OPP–2024–0093, online at <https://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting and visiting the docket, along with more information about dockets generally, is available at <https://www.epa.gov/dockets>.

**FOR FURTHER INFORMATION CONTACT:** Christopher Green, Registration Division (7505T), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 566–2707; email address: [green.christopher@epa.gov](mailto:green.christopher@epa.gov).

**SUPPLEMENTARY INFORMATION:**

**I. Executive Summary**

*A. Does this action apply to me?*

This action is directed to the public in general and may be of interest to a

wide range of stakeholders including environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action.

*B. What action is the Agency taking?*

This document announces receipt by EPA of requests from registrants to voluntarily cancel their pesticide registration and/or amend their product registrations to terminate one or more uses of the products listed in Unit II, that are currently registered under FIFRA section 3 (7 U.S.C. 136a) or section 24(c) (7 U.S.C. 136v(c)). Unless the Agency determines that there are substantive comments that warrant further review of the requests or the registrants withdraw their requests, EPA intends to issue an order in the **Federal Register** canceling and/or amending the affected registrations.

*C. What is EPA’s authority for taking this action?*

FIFRA section 6(f)(1) (7 U.S.C. 136d(f)(1)) provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled. Before acting on a request for voluntary cancellation, EPA must provide at least 30-day public comment period on the request. FIFRA further provides that, before acting on a request for voluntary cancellation or termination of any minor agricultural use, EPA must provide a 180-day comment period unless:

1. The registrants request a waiver of the comment period, or
2. The EPA Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment.

*D. What should I consider as I prepare my comments for EPA?*

1. *Submitting CBI.* Do not submit this information to EPA through email or <https://www.regulations.gov>. If you wish to include CBI in your comment, please follow the applicable instructions at <https://www.epa.gov/dockets/commenting-epa-dockets#rules> and clearly mark the information that you claim to be CBI. In addition to one complete version of the comment that includes CBI, a copy of the comment without CBI must be submitted for inclusion in the public docket. Information marked as CBI will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at <https://www.epa.gov/dockets/commenting-epa-dockets>.

*E. How can a registrant withdraw their request for voluntary cancellation?*

Registrants who choose to withdraw their request for voluntary cancellation should submit a withdrawal request in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. If the products have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling.

**II. Requests To Voluntarily Cancel and/or Amend Certain Registrations**

The registrations with pending voluntary requests for cancellation are listed in sequence by registration number (or company number and 24(c) number) in Table 1 of this unit.

### III. What is the Agency's authority for taking this action?

FIFRA section 6(f)(1) (7 U.S.C. 136d(f)(1)) provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**.

FIFRA section 6(f)(1)(B) (7 U.S.C. 136d(f)(1)(B)) requires that before acting on a request for voluntary cancellation, EPA must provide a 30-day public comment period on the request for voluntary cancellation or use termination. In addition, FIFRA section 6(f)(1)(C) (7 U.S.C. 136d(f)(1)(C)) requires that EPA provide a 180-day comment period on a request for voluntary cancellation or termination of any minor agricultural use before granting the request, unless:

1. The registrants request a waiver of the comment period, or
2. The EPA Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment.

The registrants have requested that EPA waive the 180-day comment period. Accordingly, EPA will provide a 30-day comment period on the proposed requests.

### IV. Procedures for Withdrawal of Requests

Registrants who choose to withdraw a request for product cancellation or use termination should submit the withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. If the products have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling.

### V. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products that are currently in the United States and that were packaged, labeled, and released for shipment prior to the effective date of the action. If the requests for voluntary cancellation and/or amendments to terminate uses are granted, the Agency intends to publish the cancellation order in the **Federal Register**.

In any order issued in response to these requests for cancellation of certain product registrations and/or for amendments to terminate uses, EPA proposes to include the following provisions for the treatment of any existing stocks of the products listed in Tables 1 and 2 of Unit II.

The registrant of 5383–146 has requested to sell and distribute existing stocks for 18-months after the effective

date of cancellation. The registrant will be permitted to sell and distribute existing stocks of voluntarily canceled products for 18-months after the effective date of the cancellation, which will be the date of publication of the cancellation order in the **Federal Register**. Thereafter, the registrant will be prohibited from selling or distributing product 5383–146, identified in Table 1 of Unit II., except for export consistent with FIFRA section 17 (7 U.S.C. 136o) or for proper disposal.

For all other voluntary product cancellations identified in Table 1 of Unit II., registrants will be permitted to sell and distribute existing stocks of the voluntarily canceled products for 1 year after the effective date of the cancellation, which will be the date of publication of the cancellation order in the **Federal Register**. Thereafter, registrants will be prohibited from selling or distributing all other products identified in Table 1 of Unit II., except for export consistent with FIFRA section 17 (7 U.S.C. 136o) or for proper disposal.

Once EPA has approved product labels reflecting the requested amendments to terminate uses, identified in Table 2 of Unit II., registrants will be permitted to sell or distribute products under the previously approved labeling for a period of 18

months after the date of **Federal Register** publication of the cancellation order, unless other restrictions have been imposed. Thereafter, registrants will be prohibited from selling or distributing the products whose labels include the terminated uses identified in Table 2 of Unit II., except for export consistent with FIFRA section 17 or for proper disposal.

Persons other than the registrant may sell, distribute, or use existing stocks of canceled products and/or products whose labels include the terminated uses until supplies are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the canceled products and/or terminated uses.

**SUPPLEMENTARY INFORMATION:**

*Reference:* AP300039XX.

*Purpose and Use:*

*Brief description of the purpose of the transaction:* The purpose of the transaction is to generate power through the recovery of waste heat via the conversion of the existing Al-Sadder simple cycle power plant to a combined cycle power plant.

*Brief non-proprietary description of the anticipated use of the items being exported:* The items will be used to provide power via waste heat recovery to increase the availability and reliability of power for the Iraqi people. Once completed, the combined cycle power plant will increase the production of power by 329 MW or 51% and increase plant fuel efficiency by over 50%. Because of the increased production of electricity, the project will result in a 32% reduction in greenhouse gas emissions per MWh of electricity generated. In essence, this project enables the generation of additional electricity without the need to burn a significant amount of additional natural gas.
