SUPPLEMENTARY INFORMATION:

Background

The Council has initiated an amendment to the Atlantic Mackerel, Squid, and Butterfish FMP in order to minimize the impacts of fishing gear on deep sea corals in the mid-Atlantic. The Council has approved a range of alternatives proposing designation of deep sea coral protection zones, under the discretionary authority described in section 303(b)(2)(b) of the reauthorized Magnuson-Stevens Act (MSA). These zones would consist of areas where use of certain gear types (all bottom-tending gear or all mobile bottom-tending gear) would be restricted in order to protect deep sea corals from physical damage caused by fishing gear. Although this action is being taken through the Atlantic Mackerel, Squid, and Butterfish FMP, these measures could apply to any federally regulated fishing activity occurring within the proposed areas in the Mid-Atlantic Council region. Additionally, this amendment proposes to modify the framework provisions of the FMP and require Vessel Monitoring

Systems (VMS) for all Illex squid vessels. For more information and to access the public hearing document, visit: <http://www.mafmc.org/actions/msb/am16>.
