Notice of Inventory Completion: University of Wisconsin Oshkosh, Oshkosh, WI

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of Wisconsin Oshkosh (UWO) has completed an inventory of associated funerary objects and has determined that there is a cultural affiliation between the associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the associated funerary objects in this notice may occur on or after August 29, 2025.

ADDRESSES: Send written requests for repatriation of the associated funerary objects in this notice to Adrienne Frie, University of Wisconsin Oshkosh, 800 Algoma Boulevard, Oshkosh, WI 54901, email friea@uwosh.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of UWO, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, associated funerary objects have been identified from the St. Cloud Mound Group (47-FD-0036), Fond du Lac County, WI. In 1976, an archaeology student at Wisconsin State University—Oshkosh (WSU—O), now the University of Wisconsin Oshkosh (UWO), was called to a farm where mounds were known to exist. This student, Daniel Seurer, worked with Dr. Alaric Faulkner, Assistant Professor at WSU—O, to salvage the land before the mounds were destroyed from plowing. There were no field notes from the salvage work. The human remains and items recovered from this farm were not looked at until 2012, when University of Wisconsin—Milwaukee affiliated researcher, Mark Bruhy, analyzed the

collection. He noticed that there was an original small bag labeled, “Lithics and Human Bone,” however, no bone was found in this bag. All efforts to identify the human remains from 47-FD-0036 from the UWO collection and elsewhere have failed. UWO is working under the assumption that Seurer and Dr. Faulkner removed Ancestral human remains in 1976 but they have since been disassociated from their items. The 14 associated funerary objects are six lots of lithic debitage, five lots of undecorated grit tempered body sherds, two lots of lithics, and one metal bullet casing. UWO has no knowledge or record of any potentially hazardous substances used to treat the associated funerary objects.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location of the associated funerary objects described in this notice.

Determinations

UWO has determined that:

- The 14 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
