

Pursuant to Executive Order 14056 and Title V of Public Law 100–685, National Space Council is soliciting public input through these virtual listening sessions to obtain information and recommendations from a wide array of stakeholders, including representatives from diverse industries, academia, other relevant organizations and institutions, and the general public. Virtual listening sessions will inform National Space Council Members as they develop applicable national space policy as described herein.

The virtual listening sessions will each focus on a specific theme, as described below:

1. Session on Novel Space Capabilities: 14 November 2022, 1 to 3 p.m. ET

Commercial spaceflight technologies in the United States have matured significantly over the last decade. As a direct result, the United States commercial space sector has begun to engage in a range of new activities in outer space and is planning for many more. Some of these activities are novel in and of themselves, others are novel because of who performs them or where, while still others are novel combinations of more established activities.

In the United States Space Priorities Framework (SPF), the Biden-Harris Administration highlighted the importance of an enabling policy and regulatory environment to the nation's innovation ecosystem and its thriving economic development.

U.S. regulations must provide clarity and certainty for the authorization and continuing supervision of non-governmental space activities, including for novel activities such as on-orbit servicing, orbital debris removal, space-based manufacturing, commercial human spaceflight, and recovery and use of space resources.

2. Session on Approaches for Authorization & Supervision: 21 November 2022, 1 to 3 p.m. ET

Article VI of the Outer Space Treaty obligates the United States to authorize and provide continuous supervision for the space activities of its non-governmental entities. Authorization refers to governmental permission to perform a mission or activity and supervision means ongoing governmental oversight of some sort or degree sufficient to ensure consistency with the Outer Space Treaty. The goal is a clear, predictable, and flexible regulatory and policy environment for private sector space activities that will grow and evolve in response to technological advancement and enable

continued sustainability of the space environment. This requires understanding of the operational phase of these missions.

Participants are invited to share information about their experiences and opinions about obtaining authorization to perform their current and planned activities and if/how these activities are being supervised, if current, and ideas for supervision of planned missions, to include incentives, monitoring, reporting, and others.

Speakers will have 3 minutes each to present comments and participants will be allowed to provide further details and perspectives in written format within 45 days of this publication.

*Director of Commercial Space Policy,
National Space Council.*
