SUPPLEMENTARY INFORMATION:

I. Background

On November 29, 2022, the Cabinet submitted a SIP revision containing changes to 401 Kentucky Administrative Regulation (KAR) 51:010, *Attainment status designations*, State effective June 9, 2022, to be consistent with the SO₂ designation status codified by EPA at title 40 CFR part 81, subpart C as designated pursuant to section 107 of the CAA. Regulation 401 KAR 51:010 compiles the designation status for the entire Commonwealth for the following NAAQS: ozone (O₃), fine particulate matter (PM_{2.5}), lead (Pb), carbon monoxide (CO), nitrogen dioxide (NO₂), SO₂, and Total Suspended Particles (TSP) in a tabular format that identifies the area and the legal geographical boundary description consistent with the designation status codified at 40 CFR part 81. Specifically, Kentucky’s SIP submission adds the attainment status and the legal geographical boundary description for the Henderson-Webster nonattainment area for the 2010 SO₂ NAAQS as determined by EPA in SO₂ designations effective on April 14, 2021.¹ The nonattainment area

¹ See 86 FR 16055. This round of designations for the 2010 1-hour SO₂ NAAQS was signed on December 21, 2020 (86 FR 16055 (March 26, 2021)) and April 8, 2021 (86 FR 19576 (April 14, 2021)). These designations were signed by former EPA

is comprised of Henderson County (partial) and Webster County (partial) and was designated nonattainment based on the 2017–2019, 3-year design value at the Sebree ambient air quality monitor (AQS ID: 21–101–1011).² This update is being made to ensure Kentucky’s attainment designation tables are consistent with those codified at 40 CFR 81.318 for the Commonwealth. Kentucky’s amendment to 401 KAR 51:010 also includes replacing the text “designates the status” with the phrase “establishes the designation status” in reference to the purpose of the rule. In section 2, paragraph (1), the phrase “shall be as listed” replaces “is listed” in reference to the NAAQS listed in sections 4 through 10 of 401 KAR 51:010. Subparagraph 3 is revised by replacing “defines” with “delineates” in the sentence “A road, junction, or intersection of two (2) or more roads as used in Section 7 of this administrative regulation that defines a nonattainment boundary for an area that is a portion of a county designated as nonattainment for ozone for any classification except marginal, shall include as nonattainment an area extending 750 feet from the center of the road, junction, or intersection.” Also, Kentucky removed the reference to section 7 in that sentence because section 7 specifies that it applies to ozone nonattainment areas.

Through a notice of proposed rulemaking (NPRM), published on April 11, 2024 (89 FR 25555), EPA proposed to approve the November 29, 2022, revision which amends the attainment status designations for the Henderson-Webster SO₂ nonattainment area for the 2010 primary SO₂ NAAQS. EPA’s rationale for approving the changes is described in the April 11, 2024, NPRM. Comments on the April 11, 2024, NPRM were due on or before May 13, 2024. EPA received two comments on the April 11, 2024, NPRM that are not

Administrator Andrew Wheeler on December 21, 2020, pursuant to a court-ordered deadline of December 31, 2020. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, former Acting Administrator Jane Nishida re-signed the same action on March 10, 2021, for publication in the **Federal Register**. EPA and State documents and public comments related to these final designations are in the docket at *regulations.gov* with Docket ID No. EPA–HQ–OAR–2020–0037 and at EPA’s website for SO₂ designations at <https://www.epa.gov/sulfur-dioxide-designations>.
