Title: Notice of Pesticide Registration by States to Meet a Special Local Need under FIFRA Section 24(c).

ICR Status: This is a request to renew an existing approved collection that is scheduled to expire on January 31, 2006. Under OMB regulations, agencies may continue to conduct or sponsor the collection of information while this submission is pending at OMB. This ICR describes the nature of the information collection and its estimated burden and cost. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable.

Abstract: This data collection program is designed to provide the EPA with the necessary data to review approval of a state issued pesticide registration. Section 24(c) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) authorizes the States to register additional uses of federally registered pesticides for distribution and use

within the State to meet a special local need (SLN). A state-issued registration under section 24(c) is deemed a federal registration for the purposes of the pesticides use within the States boundaries. Under the law, and pursuant to 40 CFR part 162, subpart D, a State must notify EPA, in writing, of any action it takes, *i.e.*, issues, amends, or revokes a state registration. EPA has 90 days to disapprove the registration. In such cases, the State is responsible for notifying the affected registrant.

Burden Statement: Under the PRA, "burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal Agency. It includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of this estimate, which is only briefly summarized in this notice. The annual public burden for this ICR is estimated to be 23,400. The following is a summary of the estimates taken from the ICR:

Respondents/Affected Entities: States and territorial governments.

Estimated Number of Respondents: 60.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 23,400.

Estimated Total Annual Labor Cost: \$2,126,520.

Changes in the Estimates: There is an increase of 5,200 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is an adjustment based on a rise in the number of petitions received annually over the last 3 years.

Dated: January 20, 2006.

Oscar Morales,

Director, Collection Strategies Division.

The SAB has been asked to review software developed by the Office of Pollution Prevention and Toxics known as the Estimation Programs Interface (EPI) Suite and has formed a specialized EPI Suite Review Panel for this purpose as previously announced (70 FR 4846, January 31, 2005).

The Panel will comply with the provisions of the Federal Advisory Committee Act (FACA) and all appropriate SAB procedural policies. EPI Suite is routinely used in evaluating new chemicals under EPA's Premanufacture Notices (PMNs) for new chemicals under section 5 of the Toxic Substances Control Act, and is widely used for predicting physical/chemical properties and environmental fate and transport properties for chemicals already in commerce. A more extensive description of EPI Suite can be found at: <http://www.epa.gov/opptintr/exposure/docs/episuite.htm>. EPI Suite can be downloaded from <http://www.epa.gov/opptintr/exposure/docs/EPISuitedl.htm>.
