single family home packages or kits. See item (6)B of the "Scope of the Order" sections of the Softwood Lumber Orders, 67 FR at 36068 and 67 FR at 36071, respectively. We correct and amend the "Scope of the Order" sections by replacing item (6)B with the following language:

B. The package or kit must contain all necessary internal and external doors and windows, nails, screws, glue, sub floor, sheathing, beams, posts, connectors, and if included in the purchase contract, decking, trim, drywall and roof shingles specified in the plan, design or blueprint.

This notice is published pursuant to sections 706(a) and 736(a) of the Act and 19 CFR 351.211.

Dated: May 24, 2002

## Application for Duty-Free Entry of Scientific Instrument

Pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Public Law 89–651; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether an instrument of equivalent scientific value, for the purposes for which the instrument shown below is intended to be used, is being manufactured in the United States.

Comments must comply with 15 CFR 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5 p.m. in Suite 4100W, U.S. Department of Commerce, Franklin Court Building, 1099 14th Street, NW, Washington, DC.

Docket Number: 02–017. Applicant: Emory University, Department of Biology, 2006 Rollins Research Center, 1510 Clifton Road, Atlanta, GA 30322. Instrument: Micromanipulator Assembly for Slice Physiology Setup. Manufacturer: Luigs & Neumann, Germany. Intended Use: The instrument is intended to be used to do electrophysiological studies using rat brain slices. The experiments consist of preparing slices of rat brain, putting them under the microscope and inserting microelectrodes into single

nerve cells. Once the microelectrode is inserted, a fluorescent dve will be injected into the cell body to visualize fine dendritic processes. The microscope will then be moved to focus on one of the visualized fine processes, and a second electrode can be inserted into the same cell. The main objective of this research is to understand neuronal activity and information processing in the mammalian brain. In particular, nerve cells in brain structures involved in motor control will be studied. In addition, the instrument will be used for educational purposes in the course Bio. 498. Application accepted by Commissioner of Customs: May 14, 2002.

# The University of Akron; Notice of Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89–651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in Suite 4100W, U.S. Department of Commerce, Franklin Court Building, 1099 14th Street, NW, Washington, DC.

Docket Number: 02–009. Applicant: The University of Akron, Akron, OH 44325. Instrument: Shielded Room (Low Field Cage). Manufacturer: Magnetic Measurements Ltd., United Kingdom. Intended Use: See notice at 67 FR 18862, April 17, 2002.

Comments: None received. Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. Reasons: The foreign instrument provides: (1) A cage design allowing visibility of students making measurements inside, (2) very low (about 1% of ambient field) magnetic field space over a large area (up to 2 cubic meters) allowing room for several instruments and (3) ability to actively compensate for a changing magnetic field in the building using a 3-axis fluxgate magnetometer with a sensitivity of 3nT. A domestic manufacturer of similar equipment advised May 16, 2002 that (1) these capabilities are

pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

[I.D. 051602B]

Notice of Public Scoping and Preparation of an Environmental Impact Statement for a Middle Fork Nooksack River Habitat Conservation Plan

**AGENCY:** National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Commerce; Fish and Wildlife Service, Interior.

**ACTION:** Notice of intent.

**SUMMARY:** Pursuant to the National Environmental Policy Act, this notice advises the public that the Fish and Wildlife Service and National Marine Fisheries Service (Services) intend to gather information necessary to prepare an Environmental Impact Statement (Statement). The Statement will examine the proposed approval of a Habitat Conservation Plan (Plan) and issuance of an incidental take permit (Permit) to take threatened species in accordance with the Endangered Species Act of 1973, as amended (Act). The Permit applicant is the City of Bellingham (City). The application is related to water withdrawals from the Middle Fork Nooksack River and Lake Whatcom, and related activities located in Whatcom County, Washington. The applicant intends to request Permits for chinook salmon, bull trout, and Dolly varden, which are listed as threatened under the Act. The City also plans to seek coverage for coho salmon and eight other currently unlisted fish and wildlife species under specific provisions of the Permit, should these
