

Legal Authority: Section 60401 of the Infrastructure Investment and Jobs Act of 2021, Public Law 117–58, 135 Stat. 429 (November 15, 2021)

IV. Request for Comments

We are soliciting public comments to permit the Department to:

(1) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility.

(2) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used.

(3) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected.

(4) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

SUPPLEMENTARY INFORMATION:

A. Notional DoD Catalog Data Standard

DoD has developed a high level of visibility into its contracting practices through the use of automation and data standards. For example, the Procurement Data Standard has enabled DoD to capture contract awards in discrete data elements, allowing unprecedented insights into DoD’s purchases. Data capture has also enabled implementation of tools, notably the Supplier Performance Module (SPM) in the Procurement Integrated Enterprise Environment, to improve the quality of information available when making small dollar purchases. SPM enables DoD to apply information on past performance with specific suppliers and items through reuse of data captured as a normal part of the business process. Another area in which DoD has been able to improve the buying process through automation is the FedMall, which enables purchase card holders to order items through existing Government ordering instruments through the use of a shopping cart analogous to that found on commercial sales platforms.

Efforts in both of these areas for product or service identification have been constrained by existing business practices within the Government. For example, some Government-wide ordering instruments do not have a price listed for their goods; users are directed to the company website for commercially available pricing. Different companies often describe the same commercial product or service in different ways, hampering market research. Further, legislation specific to the Department of Defense requires collection of additional information relevant to products. Providing current and accurate product data descriptions, pricing, and commercial catalog standards is essential to understanding the market.
