Natural Resources Conservation Service

Notice of Proposed Changes in the National Handbook of Conservation Practices

AGENCY: Natural Resources Conservation Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: Notice is hereby given of the intention of the Natural Resources Conservation Service (NRCS) to issue a series of new or revised conservation practice standards in its National Handbook of Conservation Practices. These standards include Heavy Use Area Protection; Irrigation System, Tailwater Recovery; Pest Management; Pipeline; and Watering Facility. These standards are used to convey national guidance when developing Field Office Technical Guide Standards used in the States. NRCS State conservationists who choose to adopt these practices for use within their States will incorporate them into Section IV of their Field Office Technical Guide. These practices may be used in conservation systems that treat highly erodible land or on land determined to be wetland.

DATES: Comments will be received for a 60-day period commencing with the date of publication. This series of new or revised conservation practice standards will be adopted after the close of the 60-day period.

FOR FURTHER INFORMATION CONTACT: Single copies of these standards are available from NRCS-CED in

Washington, DC. Submit individual inquiries and return any comments in writing to William Hughey, National Agricultural Engineer, Natural Resources Conservation Service, Post Office Box 2890, Room 6139-S, Washington, DC 20013-2890. Telephone Number 202-720-5023. The standards are also available and can be downloaded from the Internet at: http://www.ftw.nrcs.usda.gov/practice_stdts.html.

SUPPLEMENTARY INFORMATION: Section 343 of the Federal Agriculture Improvement and Reform Act of 1996 requires NRCS to make available for public review and comment proposed revisions to conservation practice standards used to carry out the highly erodible land and wetland provisions of the law. For the next 60 days, NRCS will receive comments relative to the proposed changes. Following that period, a determination will be made by NRCS regarding disposition of those comments, and a final determination of change will be made.

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce (DoC) has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Patent and Trademark Office (PTO).

Title: Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures.

Form Numbers: N/A.

Agency Approval Number: 0651-0024.

Type of Request: Reinstatement, with change, of a previously approved collection for which approval has expired.

Burden: 5,283 hours annually.

Number of Respondents: 5,601 responses annually.

Avg. Hours Per Response: Based on PTO time and motion studies, the agency estimates that it will take the

public 80 minutes to create a nucleotide/amino acid sequence listing in an application. In the electronic version of the sequence listing, EFS BIO, it is estimated that it will take 10 minutes to create and submit a sequence listing in an application.

Needs and Uses: Nucleotide and amino acid sequence disclosure information is used by the PTO during the examination process to determine the patentability of an application by effectively examining the sequences in order to process the data more efficiently. The PTO also uses the data after examination to support publication of issued patents. In addition, the sequences are used by the PTO during participation with the European and Japanese Patent Offices in a Trilateral Sequence Exchange project, thereby facilitating the international exchange of published sequence data. After patent publication, the public and the bar associations can search the nucleotide/amino acid sequence listings. Applicants use the sequence data when preparing both national and international patent applications.

Affected Public: Individuals or households, business or other for-profit institutions, not-for-profit institutions, farms, the Federal government, and state, local, or tribal governments.

Frequency: As applied for when patent applicants submit a patent application (both national and international applications) containing nucleotide and/or amino acid sequence disclosure data within their patent applications.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: David Rostker, (202) 395-3897.

Copies of the above information collection proposal can be obtained by calling or writing Linda Engelmeier, Departmental Forms Clearance Officer, Office of the Chief Information Officer, (202) 482-3272, Department of Commerce, Room 5027, 14th and Constitution Avenue, NW, Washington, DC 20230 or via e-mail at LEngelme@doc.gov.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication to David Rostker, OMB Desk Officer, Room 10202, New Executive Office Building, Washington, DC 20503.

Dated: April 4, 2000.
