

DEPARTMENT OF THE INTERIOR**Bureau of Land Management****[WY-920-09-1320-EL, WYW151133]****Belle Ayr 2000 Tract, Wyoming****AGENCY:** Bureau of Land Management, Interior.**ACTION:** Notice of competitive coal lease sale.

SUMMARY: Notice is hereby given that certain coal resources in the Belle Ayr 2000 Tract described below in Campbell County, Wyoming will be offered for competitive lease by sealed bid in accordance with the provisions of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*).

DATES: The lease sale will be held at 2 p.m., on Thursday, October 11, 2001. Sealed bids must be submitted on or before 4 p.m., on Wednesday, October 10, 2001.

ADDRESSES: The lease sale will be held in the First Floor Conference Room (Room 107) of the BLM, Wyoming State Office, 5353 Yellowstone Road, P.O. Box 1828, Cheyenne, Wyoming 82003. Sealed bids must be submitted to the Cashier, BLM, Wyoming State Office, at the address given above.

FOR FURTHER INFORMATION CONTACT: Julie Weaver, Land Law Examiner, or Melvin Schlagel, Coal Coordinator, at 307-775-6260 and 307-775-6257, respectively.

SUPPLEMENTARY INFORMATION: The coal estate of the Belle Ayr 2000 tract, Serial Number WYW151133, is being offered in response to a lease by application (LBA) request for a competitive sale filed by RAG Wyoming Land Company, a subsidiary of RAG American Coal Company. The application was filed on July 28, 2000, and was approved for processing as a maintenance tract by the Powder River Regional Coal Team on October 25, 2000. The tract is located in Campbell County approximately 11 miles south of Gillette, Wyoming, and is crossed by Bishop Road about 3 miles east of State Highway 59.

T.48 N., R. 71 W., 6th P.M., Wyoming
 Sec. 28: Lots 3-6;
 Sec. 29: Lots 1 and 6.
 Containing 243.61 acres

All of the acreage offered has been determined to be suitable for mining assuming that Bishop Road is moved as planned. The surface estate of the tract is completely controlled by the applicant. There are no oil and gas wells on the tract but these rights are privately owned and are not included in this coal lease.

The tract is within the mine permit area for the Belle Ayr mine and contains

surface mineable coal reserves in one primary seam currently being recovered at this mine. The in-place Wyodak seam averages about 76 feet thick on the LBA while the overburden averages about 192 feet thick.

The Belle Ayr LBA coal is ranked as subbituminous C. The overall average quality of the in-place reserves is 8490 BTU/lb., 30% moisture, 4.75% ash, 0.35% sulfur, and 1.02% sodium in the ash. These quality averages place the coal reserves near the middle of the range of coal quality currently being mined in the southern Powder River Basin in Campbell County.

The tract contains an estimated 31.4 million tons of mineable coal in the Wyodak seam. This estimate of reserves does not include any tonnage from localized seams or splits containing less than 5 feet of coal. Potential bidders must reduce this estimate to account for mining losses associated with thick seam recovery. The stripping ratio for the mineable reserves is approximately 3.0:1 (BCY/Ton).

The tract will be leased to the qualified bidder of the highest cash amount provided that the high bid equals the fair market value of the tract and other applicable requirements are met. The minimum bid for the tract is \$100 per acre or fraction thereof. No bid that is less than \$100 per acre, or fraction thereof, will be considered. The bids should be sent by certified mail, return receipt requested, or be hand delivered. The Cashier will issue a receipt for each hand-delivered bid. Bids received after 4 p.m., on Wednesday, October 10, 2001, will not be considered. The minimum bid is not intended to represent fair market value. The fair market value of the tract will be determined by the Authorized Officer after the sale.

The lease issued as a result of this offering will provide for payment of an annual rental of \$3 per acre, or fraction thereof, and of a royalty payment to the United States of 12.5 percent of the value of coal produced by strip or auger mining methods and 8 percent of the value of the coal produced by underground mining methods. The value of the coal will be determined in accordance with 30 CFR 206.250.

Bidding instructions for the tract offered and the terms and conditions of the proposed coal lease are available from the BLM, Wyoming State Office at the addresses above. Case file documents, WYW151133, are available for inspection at the BLM, Wyoming State Office.

Dated: August 1, 2001.

Alan Rabinoff,*Deputy State Director, Minerals and Lands.*

BILLING CODE 4310-22-P**INTERNATIONAL TRADE COMMISSION****[Investigations Nos. 701-TA-417-421 and 731-TA-953-963 (Preliminary)]**

Carbon and Certain Alloy Steel Wire Rod From Brazil, Canada, Egypt, Germany, Indonesia, Mexico, Moldova, South Africa, Trinidad and Tobago, Turkey, Ukraine, and Venezuela

AGENCY: International Trade Commission.**ACTION:** Institution of countervailing duty and antidumping investigations and scheduling of preliminary phase investigations.

SUMMARY: The Commission hereby gives notice of the institution of investigations and commencement of preliminary phase countervailing duty and antidumping investigations Nos. 701-TA-417-421 (Preliminary) and 731-TA-953-963 (Preliminary)¹ under sections 703(a) and 733(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a) and 1673b(a)) (the Act) to determine whether there is a reasonable indication that an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of carbon and certain alloy steel wire rod,² provided for in subheadings 7213.91, 7213.99, 7227.20, and 7227.90.60 of the Harmonized Tariff Schedule of the United States, that are alleged to be subsidized by the

¹ Investigations Nos. 701-TA-417-421 (Preliminary) cover imports from Brazil, Canada, Germany, Trinidad and Tobago, and Turkey, respectively. Investigations Nos. 731-TA-953-963 (Preliminary) cover imports from Brazil, Canada, Egypt, Germany, Indonesia, Mexico, Moldova, South Africa, Trinidad and Tobago, Ukraine, and Venezuela, respectively.

² For purposes of these investigations, carbon and certain alloy steel wire rod is defined as hot-rolled bars and rods, in irregularly wound coils, of circular cross section, having a diameter of 5 mm or more but less than 19 mm, of non-alloy or alloy steel, except such bars and rods of free-machining steel or of alloy steel containing by weight 24 percent or more of nickel. Free-machining steel is any steel product containing by weight one or more of the following elements, in the specified proportions: 0.03 percent or more of lead, 0.05 percent or more of bismuth, 0.08 percent or more of sulfur, more than 0.04 percent of phosphorus, more than 0.05 percent of selenium, and/or more than 0.01 percent of tellurium. The investigations do not cover concrete reinforcing bars and rods, or bars and rods of stainless steel or tool steel.
