

The grantee survey will be conducted with all 820 regular Upward Bound projects in the spring of 2013. Preliminary results from the survey, which will be shared internally within ED in late Spring 2013, will help inform the selection of a yet-to-be determined promising strategy or strategies for a possible experimental study that could be implemented in a set of UB grantees. ED will decide whether to exercise the option for a study of promising strategies in Upward Bound by June 2013, based, in large part, on the findings from the survey of UB grantees.

Additionally, IES plans to publicly release the findings from the survey of UB grantees through a report that will require approval by the IES Standards and Review Office. This report will be of great interest to program providers and researchers concerned about college access programs in light of the recent changes to the Upward Bound program that were made in the 2012 grant competition. One of the important questions arising from the UB 2012 grant competition is what type of approaches or strategies UB projects initiated in an effort to reduce the cost of implementing key program components while not reducing the number of students served. For example, a review of 2012 UB grant applications revealed that UB applicants proposed introducing the use of various technologically-based approaches to delivering some program components. The UB grantee survey is intended to identify and describe the specific strategies that UB projects actually implement to fulfill their grant objectives in conducting required program components.
