

The No Action alternative is the same alternative as was discussed in the 1996 Implementation EIS; that is, no dam removal would take place. Because the dams would remain, water and flooding mitigation would not be needed.

**Scoping.** Public scoping for the SEIS took place in September and October 2002, and six comment letters resulting in twelve comments were received. All scoping comments are addressed in the SEIS (in chapter 5, Consultation and Coordination). In addition to public scoping, the park and its cooperating agencies have also consulted with the U.S. Fish and Wildlife Service and NOAA Fisheries to provide protection and restoration for bull trout and chinook salmon.

**Comments:** This Supplement to the 1996 Implementation EIS is now available for public review. Interested persons and organizations wishing to express any concerns or comments should send written comments to Dr. Brian Winter, Elwha Project Manager, at 826 East Front Street, Ste. A, Port Angeles, WA 98362; telephone inquiries may be directed to (360) 565-1320. Faxed or electronic transmittals will be accepted also (electronic comments should be sent to [Brian\\_Winter@nps.gov](mailto:Brian_Winter@nps.gov), and faxes may be sent to (360) 565-1325).

Because several public meetings have already taken place on the 1996 Implementation EIS (and the prior Programmatic EIS for dam removal), no additional public meeting for this supplement to discuss mitigation measures is anticipated. Therefore, written comments are the only vehicle for making your opinions and concerns known and a part of the record for this SEIS process. The following options are available: you may request a summary of the SEIS, a full paper copy of the SEIS, a CD of the SEIS and/or a CD of the full 1996 Implementation EIS which the subject document supplements. Those who commented during prior scoping processes will receive a full SEIS and a CD of the FEIS, as will agencies and others on the park mailing list (see chapter 5 of the SEIS). Please specify which of these documents/CDs you would like to receive when calling, e-mailing or faxing the Elwha Project Management Office. Finally, both the SEIS and 1996 Implementation EIS will be posted on the Elwha project Web site at <http://www.nps.gov/olym/elwha/home.htm>.

All written comments must be postmarked no later than 60 days from the date the Environmental Protection Agency publishes its notice of filing in the **Federal Register**. Immediately upon confirmation of this date it will be

posted on the park's Web site and announced via local and regional media. Please keep in mind that *decisions or facts in the 1996 implementation EIS are not subject to public comment at this time*. The 1996 Implementation EIS is being made available for background information only, and no response to comments made on the 1996 Implementation EIS during this 60-day review period will be forthcoming in the final SEIS. In other words, decisions associated with dam removal and sediment management have already been made and the information on which they were made has already been publicly reviewed—comments should be confined to information provided in the SEIS only. Be sure to include your complete name and address along with your comments. Please note that names and addresses of people who comment become part of the public record. If individuals commenting request that their name or/and address be withheld from public disclosure, it will be honored to the extent allowable by law. Such requests must be stated prominently in the beginning of the comments. There also may be circumstances wherein the NPS will withhold from the record a respondent's identity, as allowable by law. As always: the NPS will make available to public inspection all submissions from organizations or businesses and from persons identifying themselves as representatives or officials of organizations and businesses; and, anonymous comments may not be considered.

Dated: September 13, 2004.

#### **General Management Plan, Record of Decision, Big Bend National Park, TX**

**AGENCY:** National Park Service, Interior.

**ACTION:** Notice of Availability of a Record of Decision on the Final Environmental Impact Statement for the General Management Plan, Big Bend National Park.

**SUMMARY:** Pursuant to § 102(2)(C) of the National Environmental Policy Act of 1969, 83 Stat. 852, 853, codified as amended at 42 U.S.C. 4332(2)(C), the National Park Service (NPS) announces the availability of the Record of Decision for the General Management Plan/Environmental Impact Statement for Big Bend National Park, Texas. On September 13, 2004, the Director, Intermountain Region approved the Record of Decision for the project. As soon as practicable, the NPS will begin to implement the General Management Plan, described as the Preferred Alternative contained in the Final Environmental Impact Statement issued July 9, 2004. In the preferred alternative, a new visitor center will be built at Panther Junction to provide room for interpretive media to adequately interpret key aspects of the park's stories and to help visitors plan their stays. The space in the headquarters building vacated by the visitor center function will be redesigned for staff offices. A storage warehouse,
