#### Economic Research Service

*Title:* Census of Users of the National Plant Germplasm System.

*OMB Control Number:* 0536-NEW.

*Summary of Collection:* The Census of Users of the National Plant Germplasm System (NPGS) is a new, one-time, data collection. The census will solicit data from the 6,009 institutional representatives who requested germplasm (*i.e.*, living tissue from which plants can be grown) for any of ten crops including beans, barley, cotton, maize, sorghum, squash, soybeans, potato, rice, and wheat from the NPGS over a five year period from January 2009 to December 2013. Each respondent will be asked to provide information via a web-based questionnaire. The legal authority for the planned data collection is 7 U.S.C. 2204(a) and 7 U.S.C. 427.

*Need and Use of the Information:* The information to be collected by the "Census of Users of the National Plant Germplasm System" is necessary to assess and understand the types and varieties of germplasm needed by breeders and other scientists in both the public and private sectors. This study will provide data currently not available to program officials and researchers, thereby broadening the scope of analyses of genetic enhancement, and in turn, enhancing R&D and productivity research at the Economic Research Service, the National Plant Germplasm System, and the National Germplasm Resource Laboratory. Without the combination of data about traits sought and the purpose intended for germplasm, it will be difficult or impossible to assess the use of NPGS resources for adaptation to changing conditions.

*Description of Respondents:* Individuals or households; Businesses or other-for-profit; Not-for-profit institutions; State, Local or Tribal Government; Federal Government.

*Number of Respondents:* 6,009.

*Frequency of Responses:* Reporting: Other: One time.

*Total Burden Hours:* 1,620.

#### Agricultural Marketing Service

*Title:* Vegetable and Specialty Crops.

*OMB Control Number:* 0581-0178.

*Summary of Collection:* The Agricultural Marketing Agreement Act of 1937 (7 U.S.C. 601-674; Act) was designed to permit regulation of certain agricultural commodities for the purpose of providing orderly marketing conditions in interstate commerce and improving returns to growers. The Orders and Agreements become effective only after public hearings are held in accordance with formal rulemaking procedures specified by the Act. The vegetable, and specialty crops marketing order programs provide an opportunity for producers in specified production areas to work together to solve marketing problems that cannot be solved individually.

*Need and Use of the Information:* Various forms are used to collect information necessary to effectively carry out the requirements of the Act and the Order/Agreement. Information collected is used to formulate market policy, track current inventory and statistical data for market development programs, ensure compliance, and verify eligibility, monitor and record grower's information. If this information is not collected, it would eliminate data needed to keep the industry and the Secretary abreast of changes at the State and local level.
