FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 90

[WP Docket No. 07–100, FCC 15–28]

Private Land Mobile Radio Services

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Federal Communications Commission (Commission) grants an unopposed petition filed by the Public Safety Communications Council (PSCC) for partial reconsideration of the *Fifth Report and Order* in this proceeding. Specifically, for applicants seeking authority to operate centralized trunked stations on Public Safety Pool channels, we eliminate the requirement that the applicant demonstrate that the proposed station’s service contour will not be overlapped by any incumbent station’s interference contour. We also amend the rule changes adopted in the *Fifth Report and Order* regarding treatment of mobile stations to clarify how to protect 150–174 MHz band mobile stations that are

associated with a base station. This proceeding is part of our continuing effort to provide clear and concise rules that facilitate new wireless technologies, devices and services, and are easy for the public to understand.

DATES: Effective May 4, 2015.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission’s *Second Order on Reconsideration* in WP Docket No. 07–100; FCC 15–28, adopted on March 9, 2015, and released March 11, 2015. Summary

1. A trunked radio system employs technology that can search two or more available channels and automatically assign a user an open channel. In the *Fifth Report and Order*, the Commission revised, clarified, and streamlined § 90.187 of its rules, which specifies the manner in which trunking may be accomplished in the 150–174 MHz and 421–512 MHz private land mobile radio bands. PSCC seeks reconsideration with respect to two of those rule changes.

2. *Section 90.187(d)(3)*. As noted in the *Fifth Report and Order*, § 90.187 requires that a trunked system monitor the frequencies and employ equipment that prevents transmission on a frequency if a signal from another system is present on it, with certain exceptions. One of these exceptions is if the licensee obtains the written consent of all “affected licensees.” Whether an incumbent is an affected licensee depends on both the spectral proximity of the existing and proposed frequencies, and the physical proximity of the existing and proposed facilities. In the *Fifth Report and Order*, the Commission modified § 90.187 to require that the contour analysis used to determine physical proximity be performed by an applicant for a new centralized trunked system to demonstrate both that (1) the proposed system’s interference contour will not overlap any spectrally proximate incumbent system’s service contour;
