Call Authentication Trust Anchor; Appeals of the STIR/SHAKEN Governance Authority Token Revocation Decisions**AGENCY:** Federal Communications Commission.**ACTION:** Final rule.

SUMMARY: In this document, the Federal Communications Commission (the Commission) adopts rules establishing a process for voice service providers aggrieved by a token revocation decision of the private STIR/SHAKEN Governance Authority to file a request for review to the Commission. Without this process the private STIR/SHAKEN Governance Authority can place other private entities out of compliance with the Commission's STIR/SHAKEN implementation rules without oversight from the Commission. The adopted rules will provide appropriate oversight and ensure due process for voice service providers aggrieved by a Governance Authority token revocation decision.

DATES: Effective September 30, 2021.

Synopsis**I. Introduction**

Caller ID authentication using the STIR/SHAKEN framework is a key component of our multi-pronged effort to combat the scourge of illegal robocalls. STIR/SHAKEN is a set of technological standards that helps to prevent illegal “spoofing,” a practice that involves falsifying caller ID information in order to trick unsuspecting Americans into thinking that calls are trustworthy because the caller ID information appears as if the call came from a neighbor or a familiar or reputable source. With voice service providers required by our rules to implement STIR/SHAKEN in the internet Protocol (IP) portions of their networks by June 30, 2021, Americans are now in a position to answer their phones with greater confidence that the number displayed is correct.

To guard against bad actors and preserve trust within the distributed caller ID authentication system, the ability of a voice service provider to participate in STIR/SHAKEN can be revoked by the private Governance Authority that oversees the STIR/SHAKEN framework. This revocation process effectively allows the private Governance Authority to make decisions that render voice service providers noncompliant with our rules. To provide appropriate oversight and ensure due process, today we establish a process for voice service providers to appeal such revocation decisions to the Commission.

II. Background

To address the issue of illegal caller ID spoofing, technologists from the internet Engineering Task Force (IETF) and the Alliance for Telecommunications Industry Solutions (ATIS) developed standards to allow for
