The Commission's rules of practice require all interveners filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervener files comments

or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Cooperating Agencies:* We are asking Federal, State, local, and tribal agencies with jurisdiction and/or special expertise with respect to environmental issues to cooperate with us in the preparation of the environmental document. The project generates an average of 636,397 megawatt-hours of electricity annually.

AmerenUE currently operates, and is proposing to continue to operate, the Osage Project as a peaking and load regulation facility. AmerenUE proposes to upgrade two of the facility's eight main generating units and the two smaller, auxiliary generating units. With the proposed upgraded units, energy generation is estimated to increase by about 5.6 percent. In addition to the physical plant upgrades, AmerenUE proposes a variety of environmental and recreation measures.
